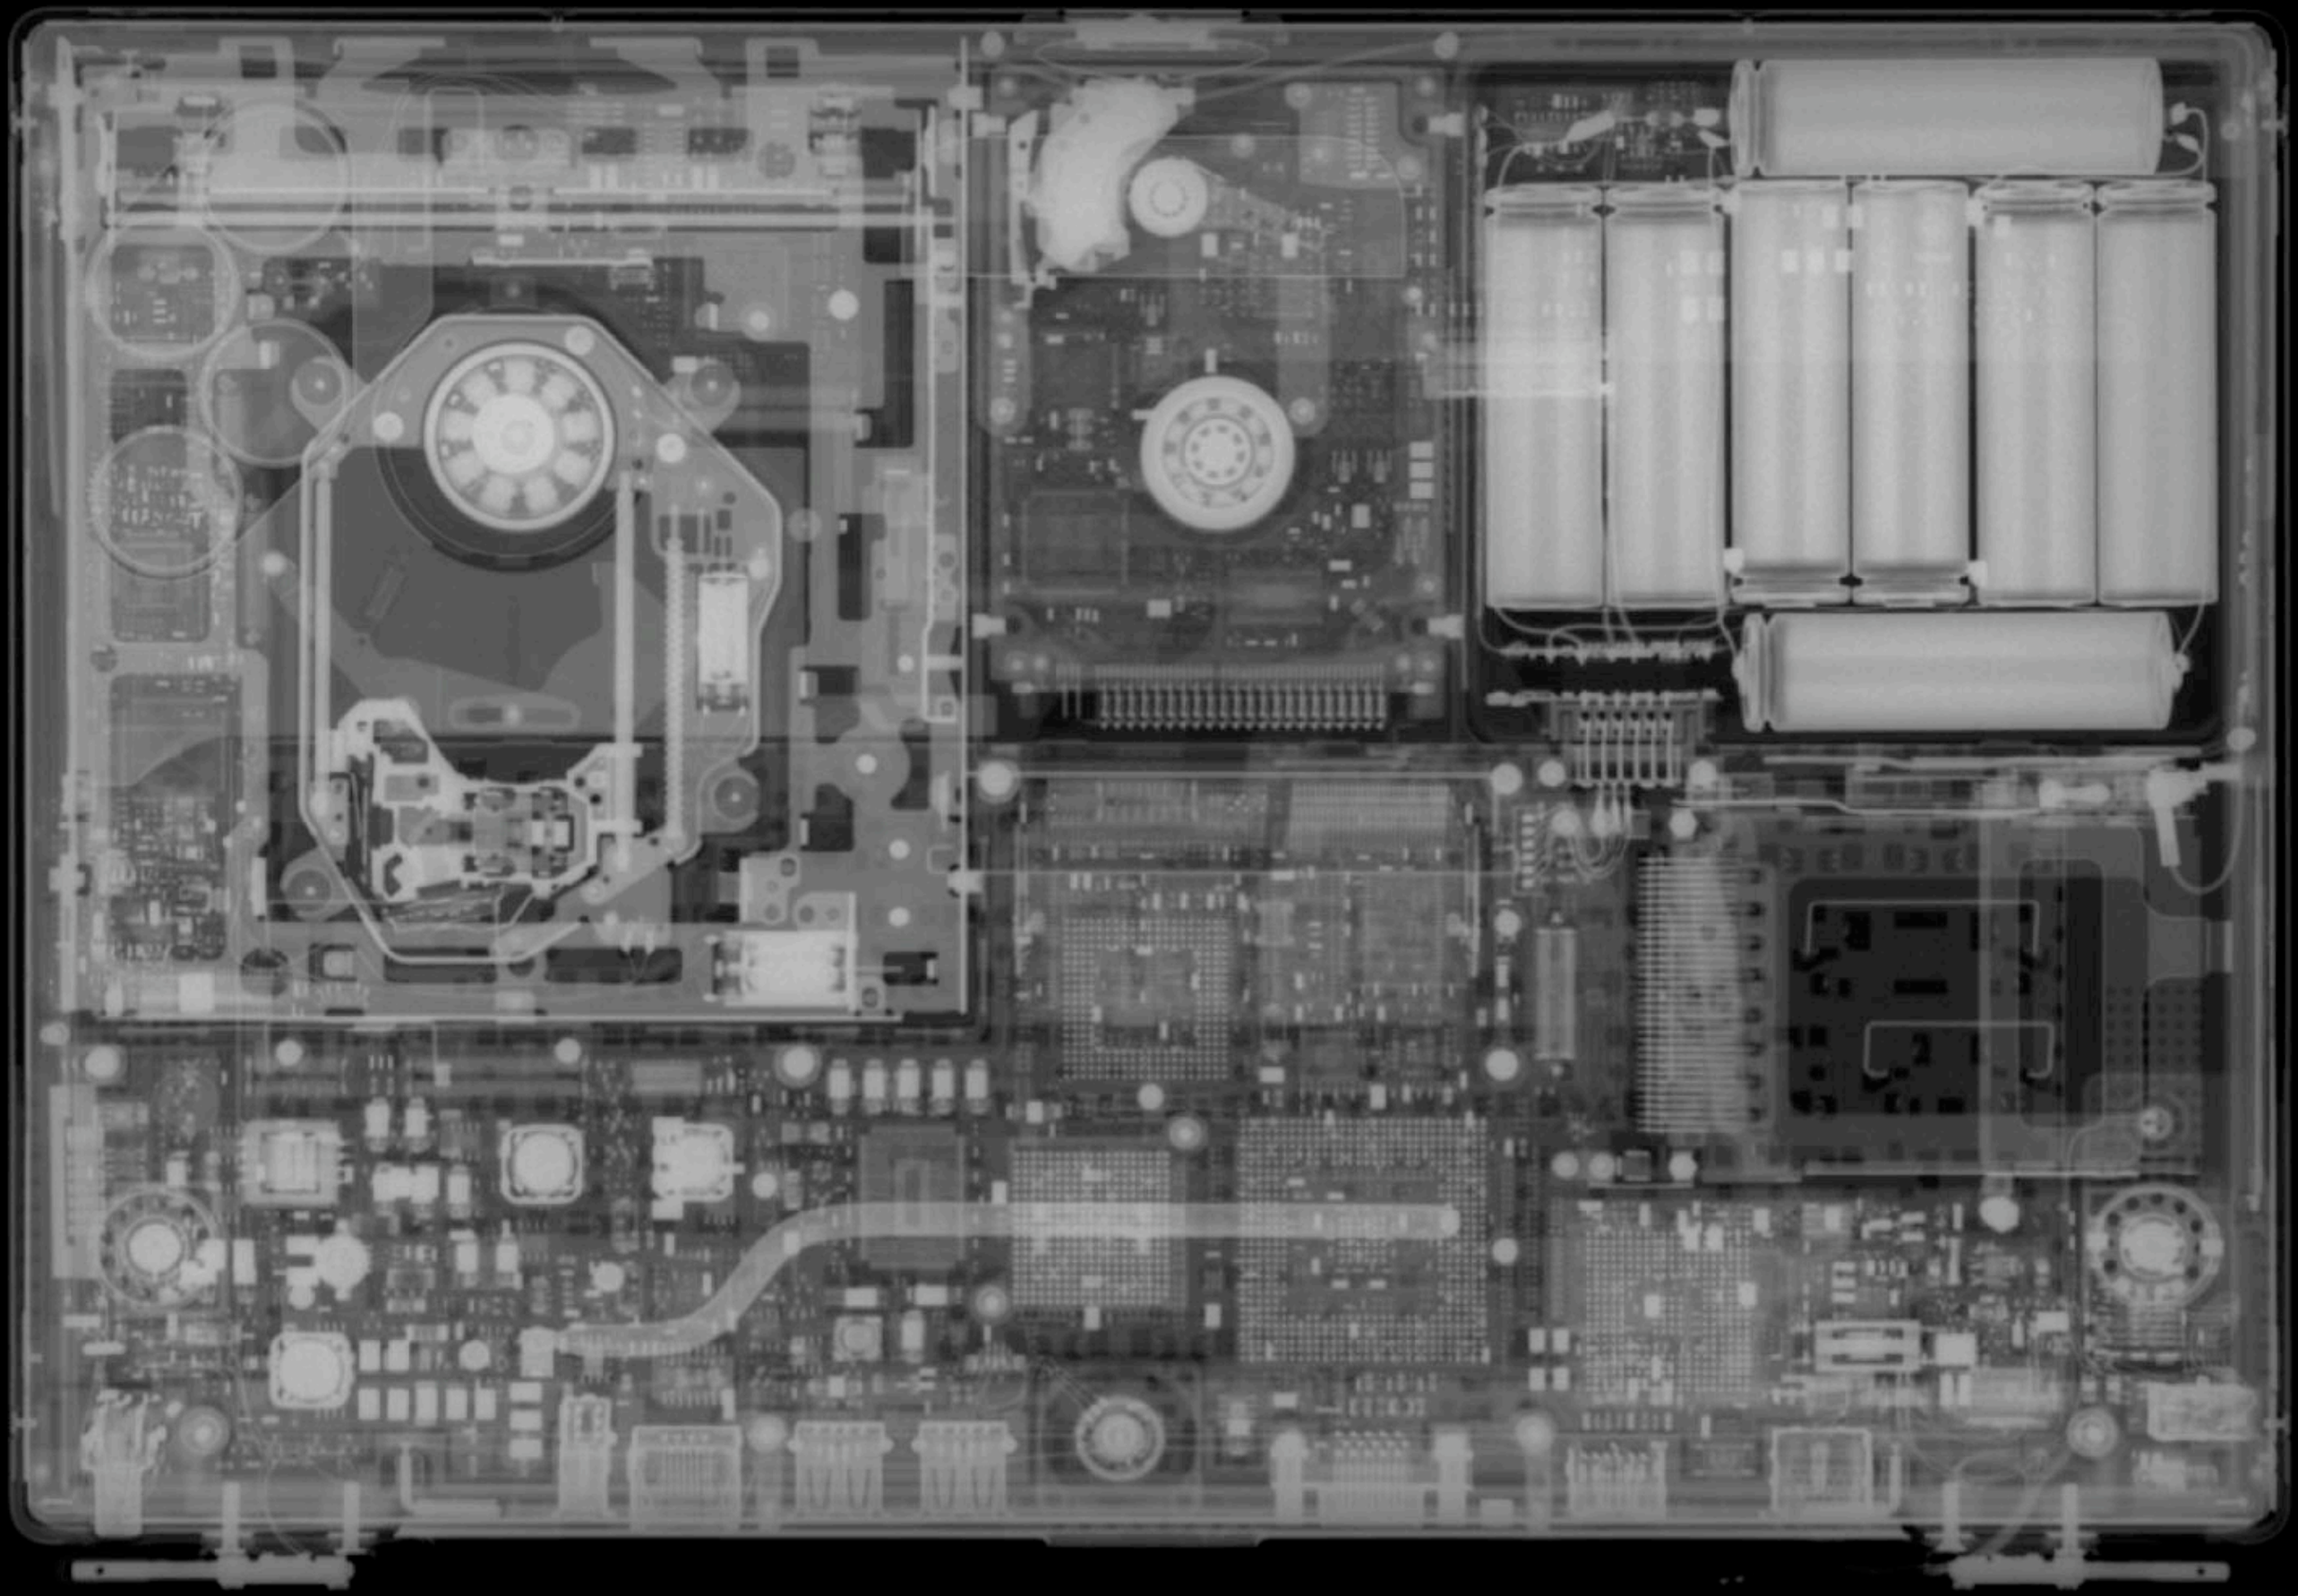
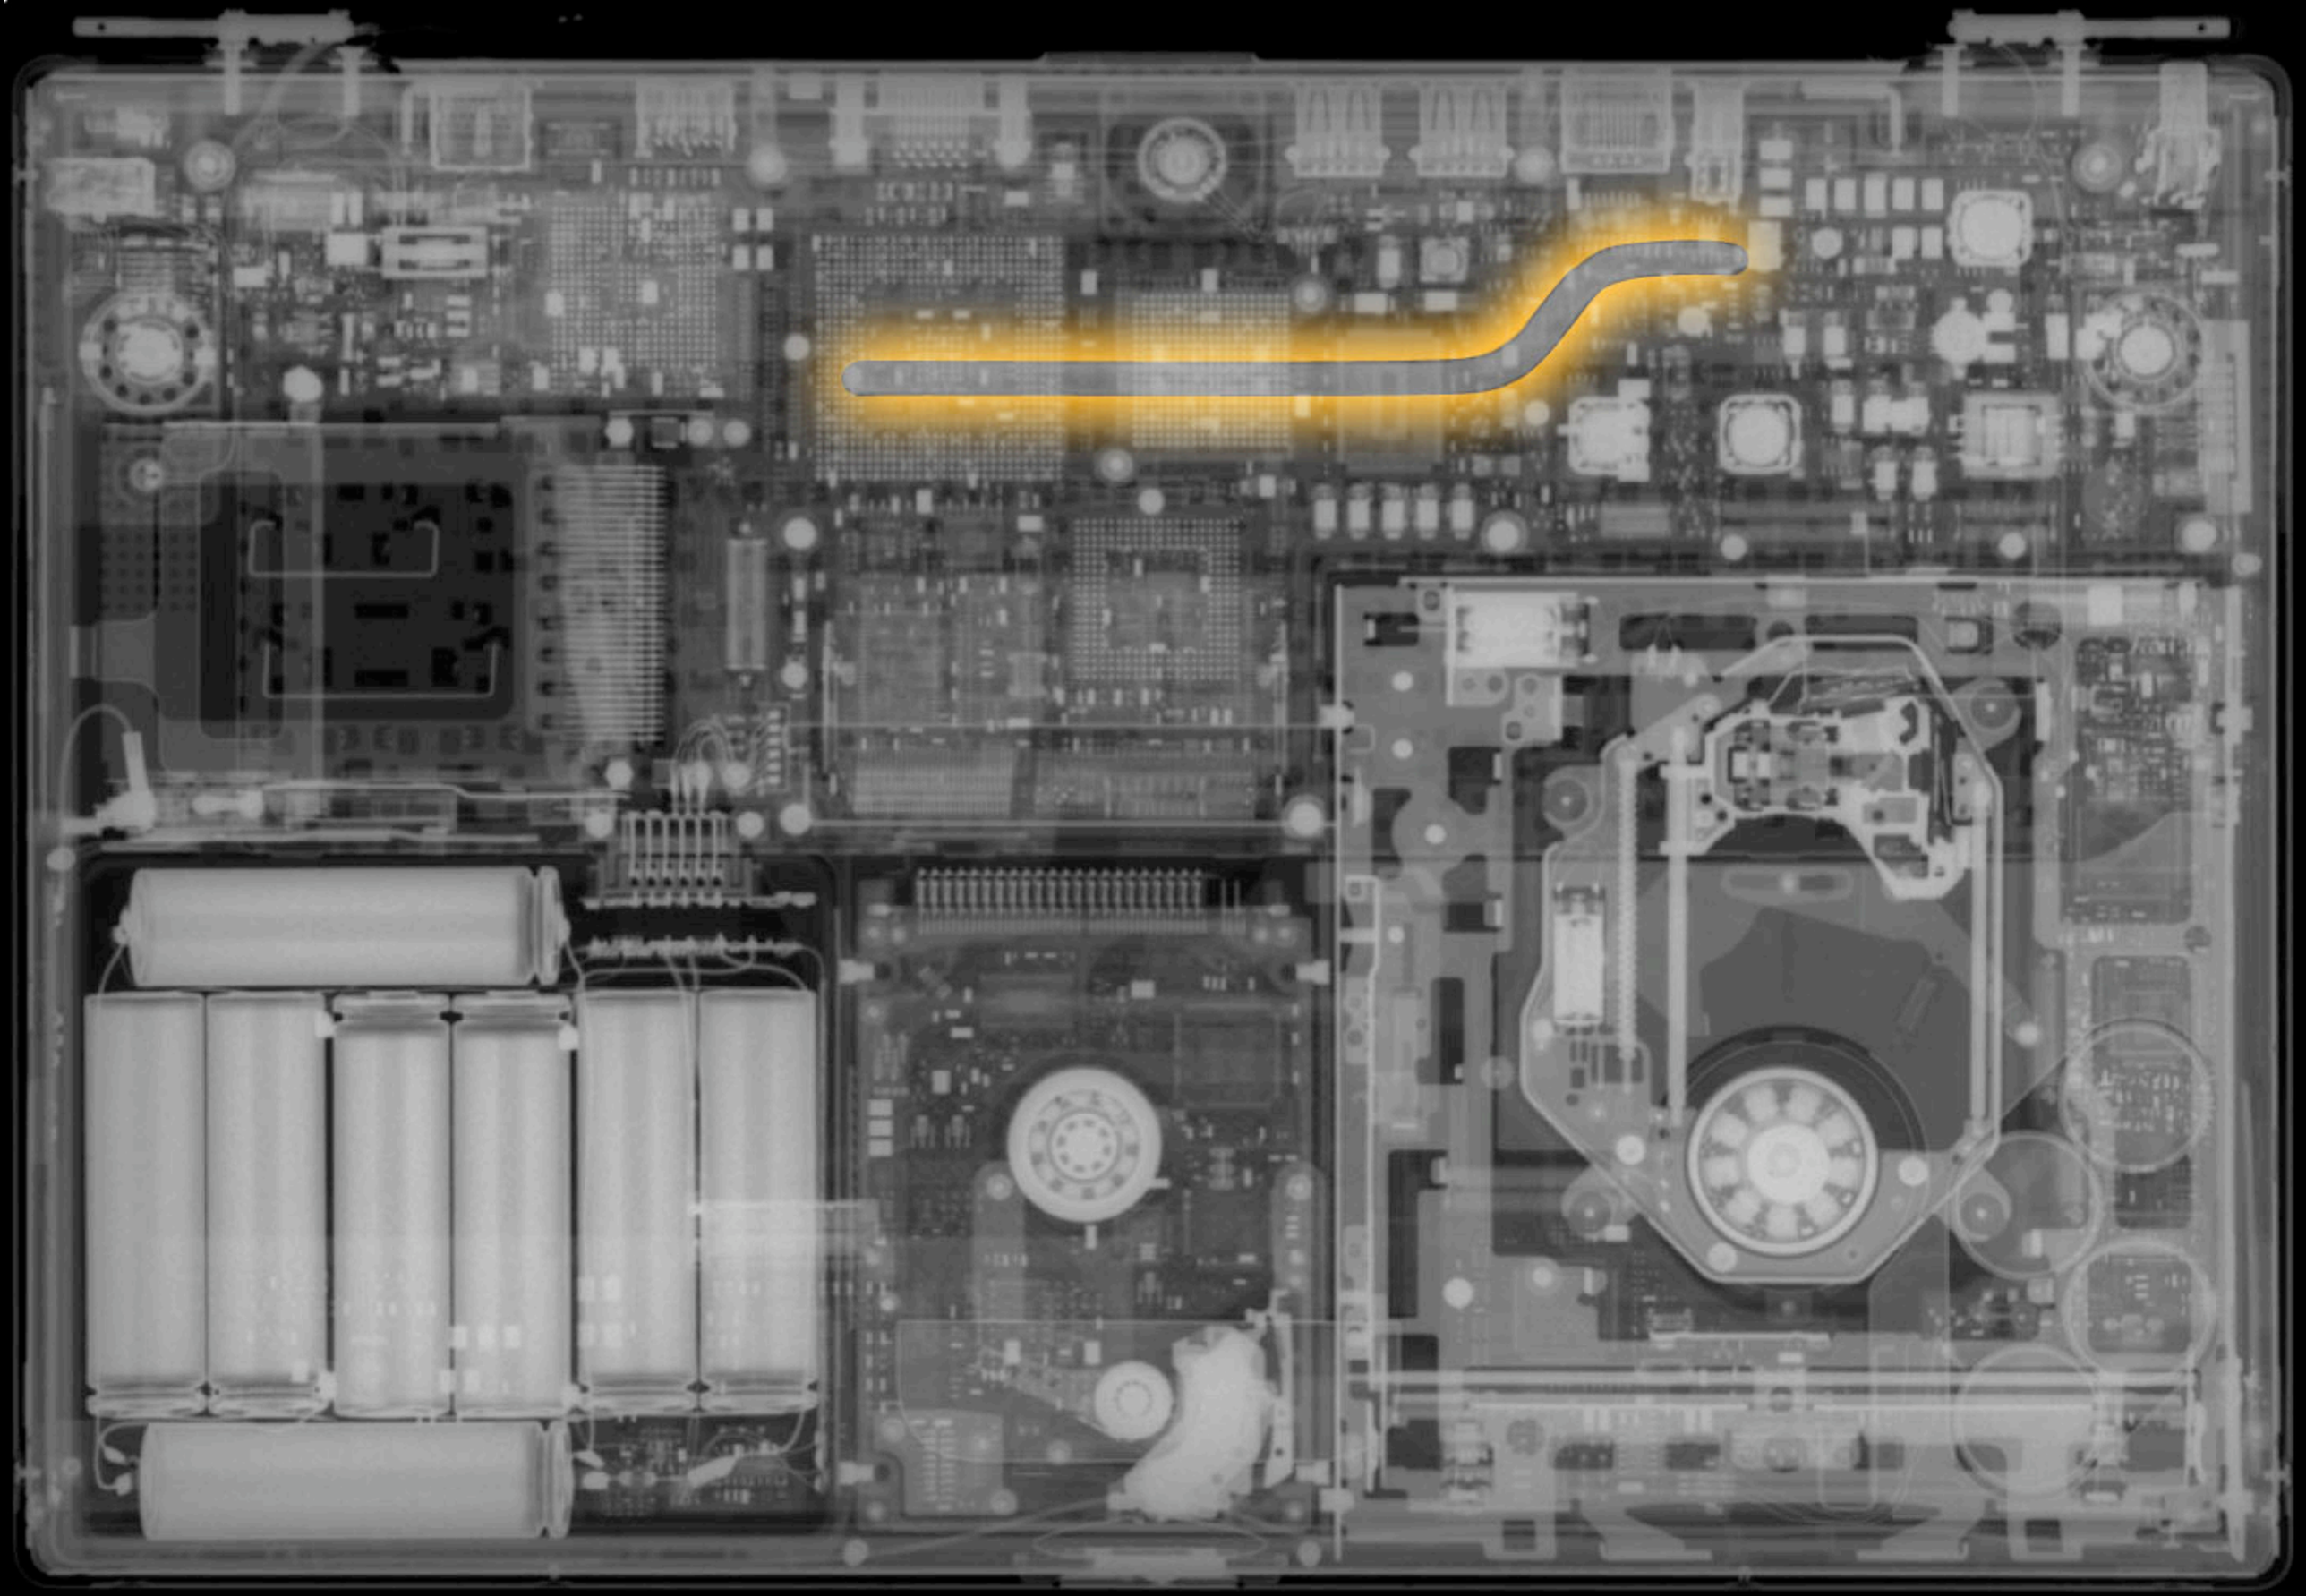
# Mobility

New Releases More

New Releases More

New Releases More

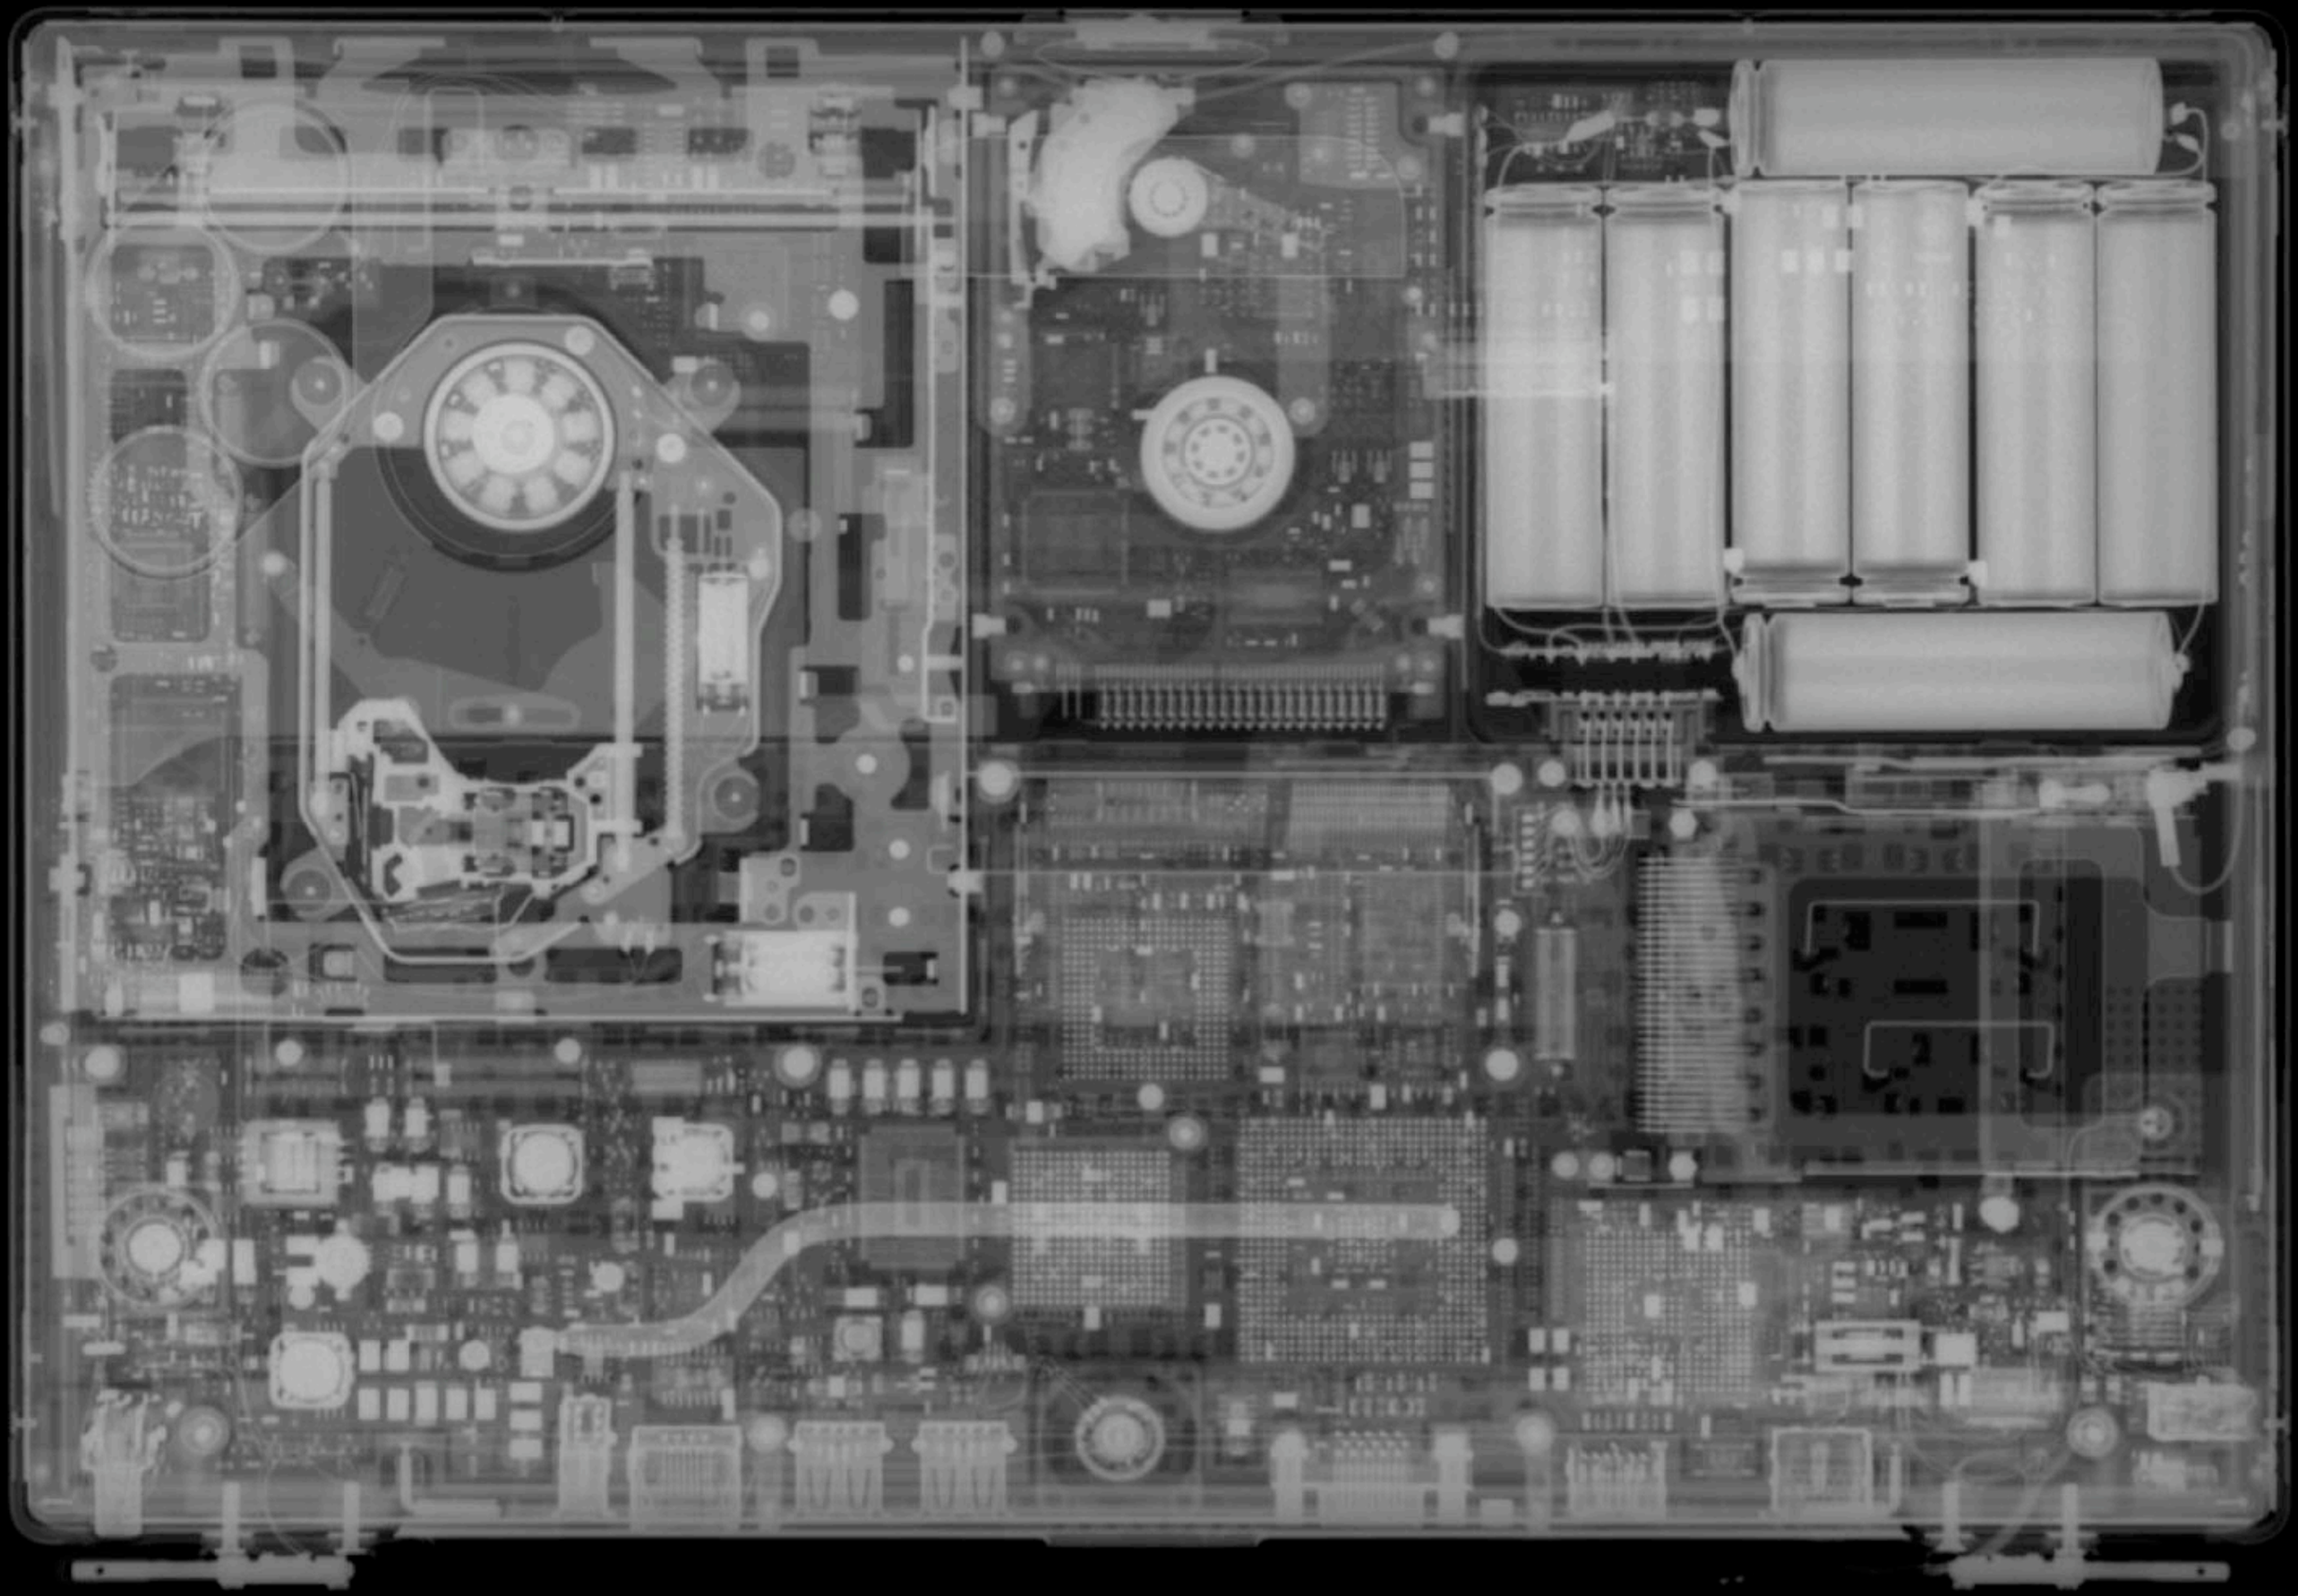


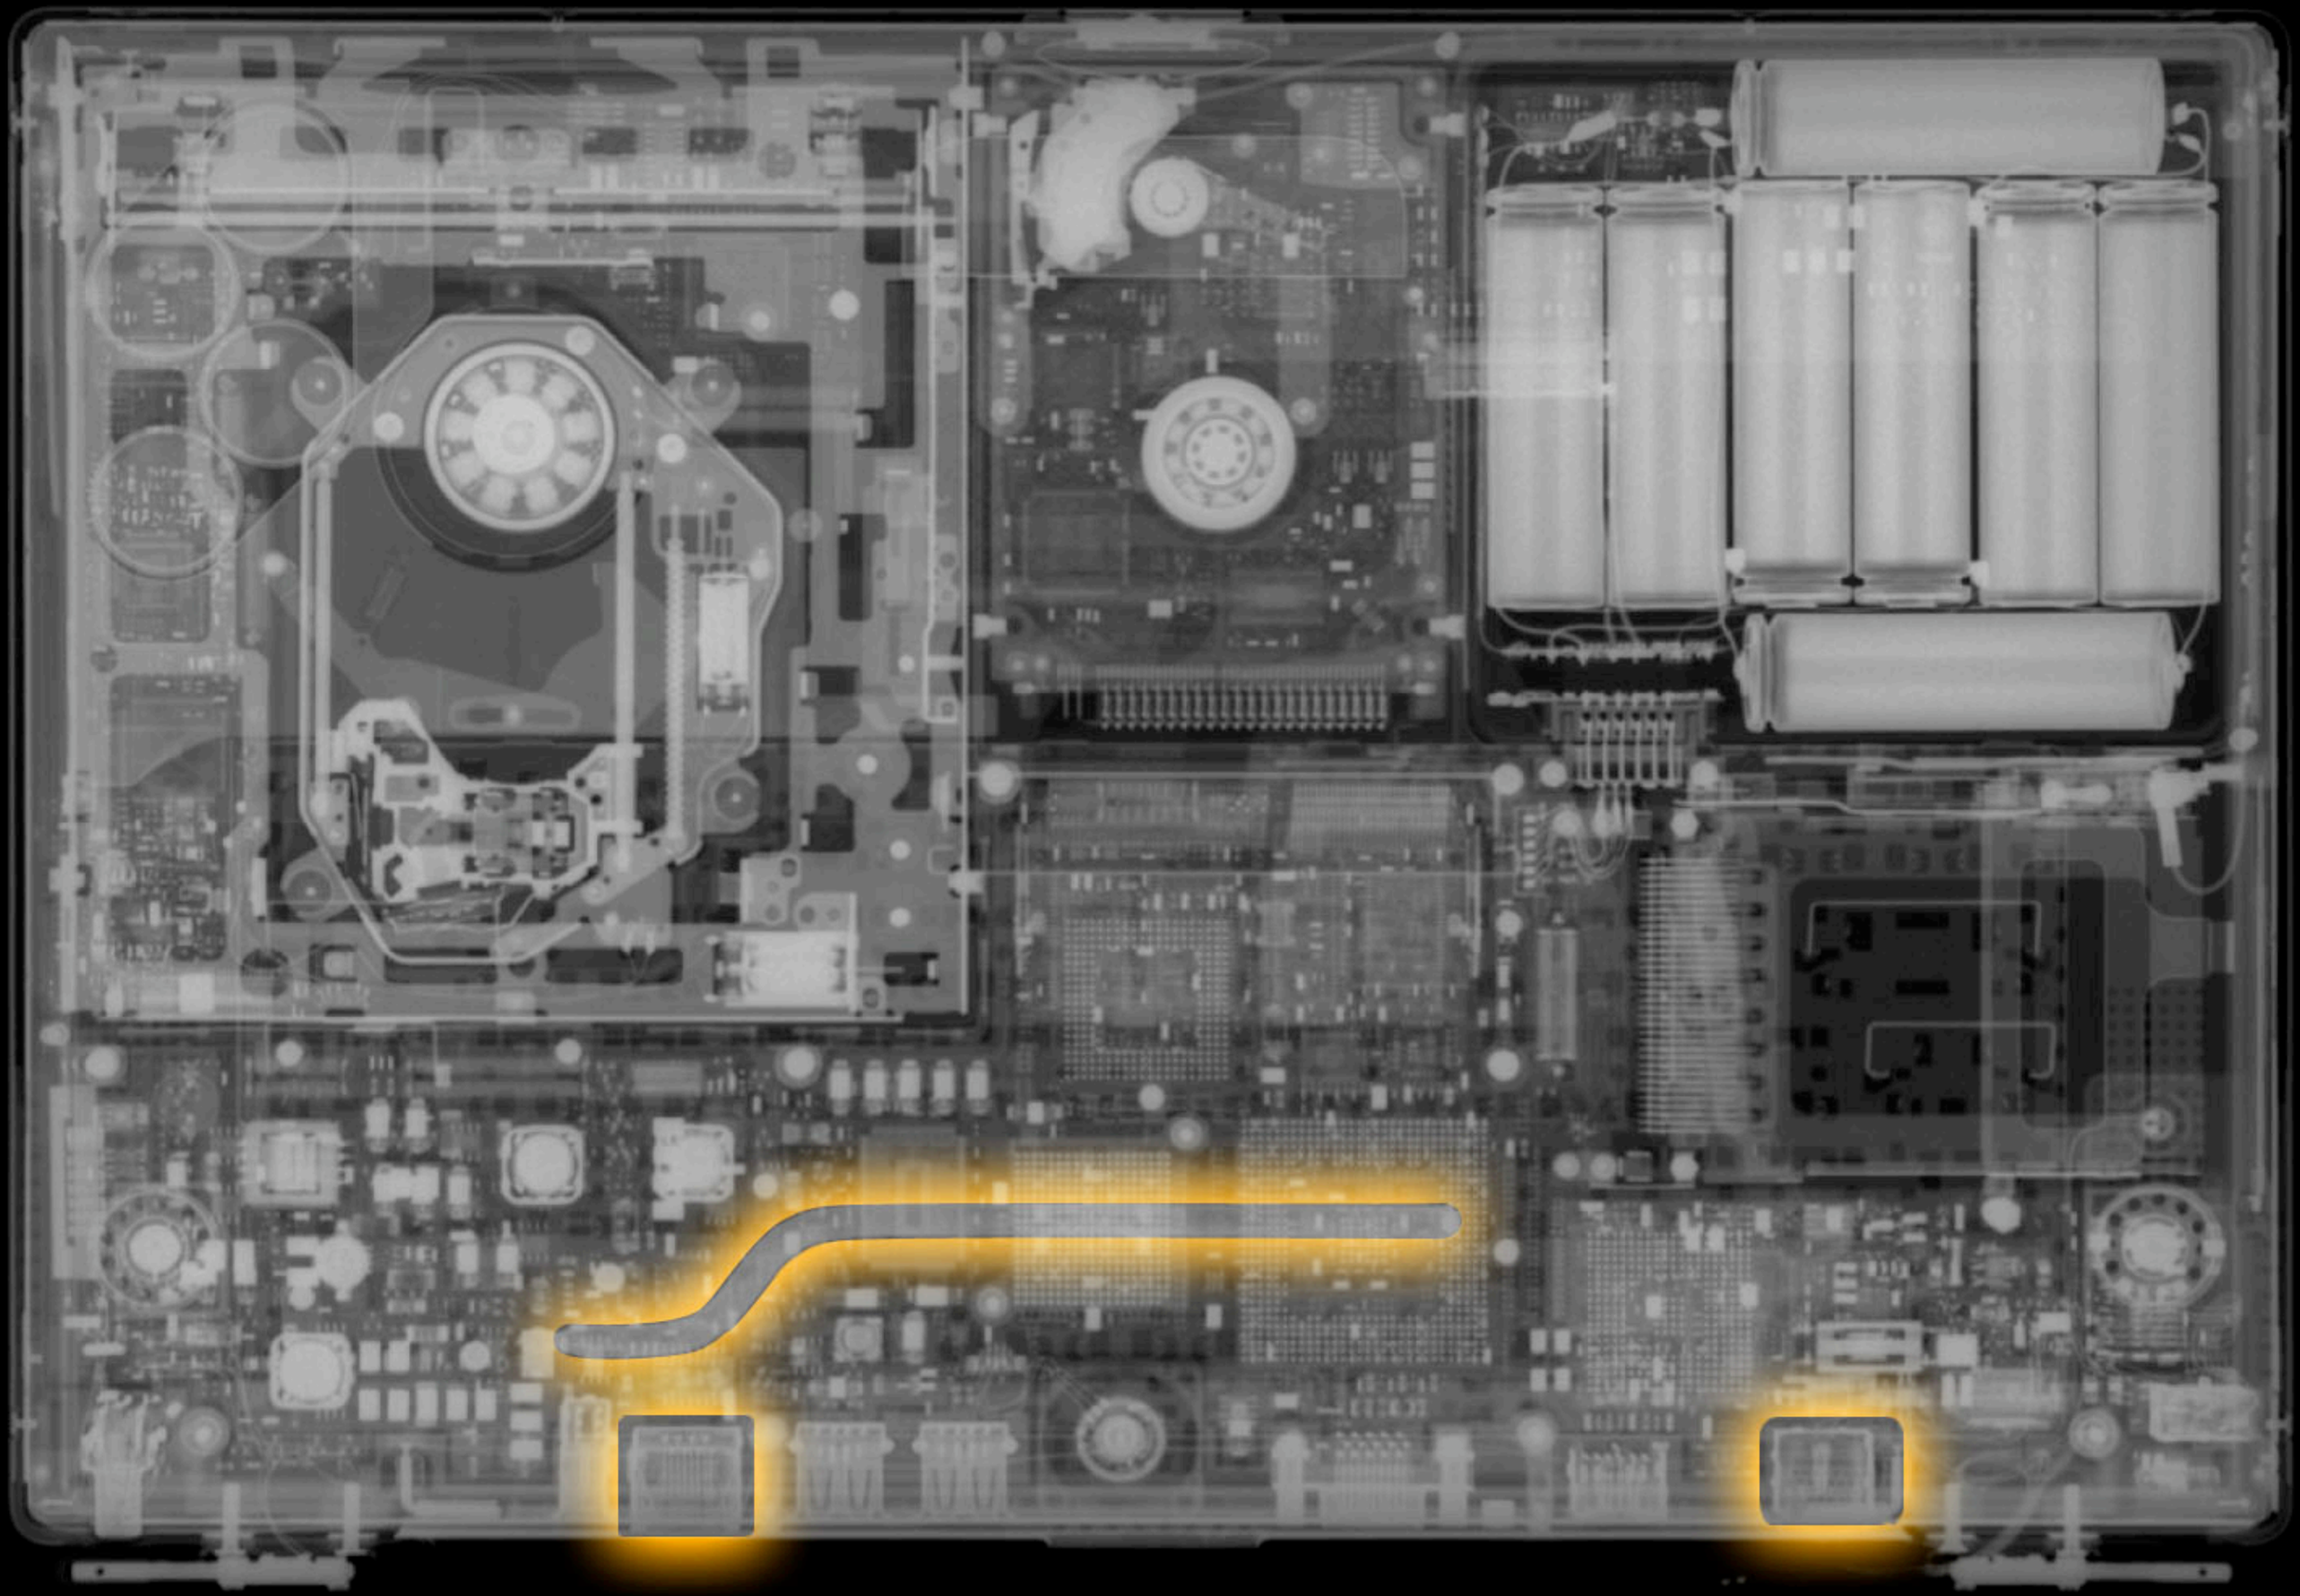


# Wireless

# Wireless

- 802.11b (Airport)
  - 11 Mb
- 802.11g (Airport Extreme)
  - 50 Mb
- 802.1x authentication
  - Not just wireless





# Networking

- Networking is hard!
- System service

# New in Panther

- IPv6
- IPsec
- VPN
- 802.1x
- **Advanced reachability APIs**

# CFNetwork

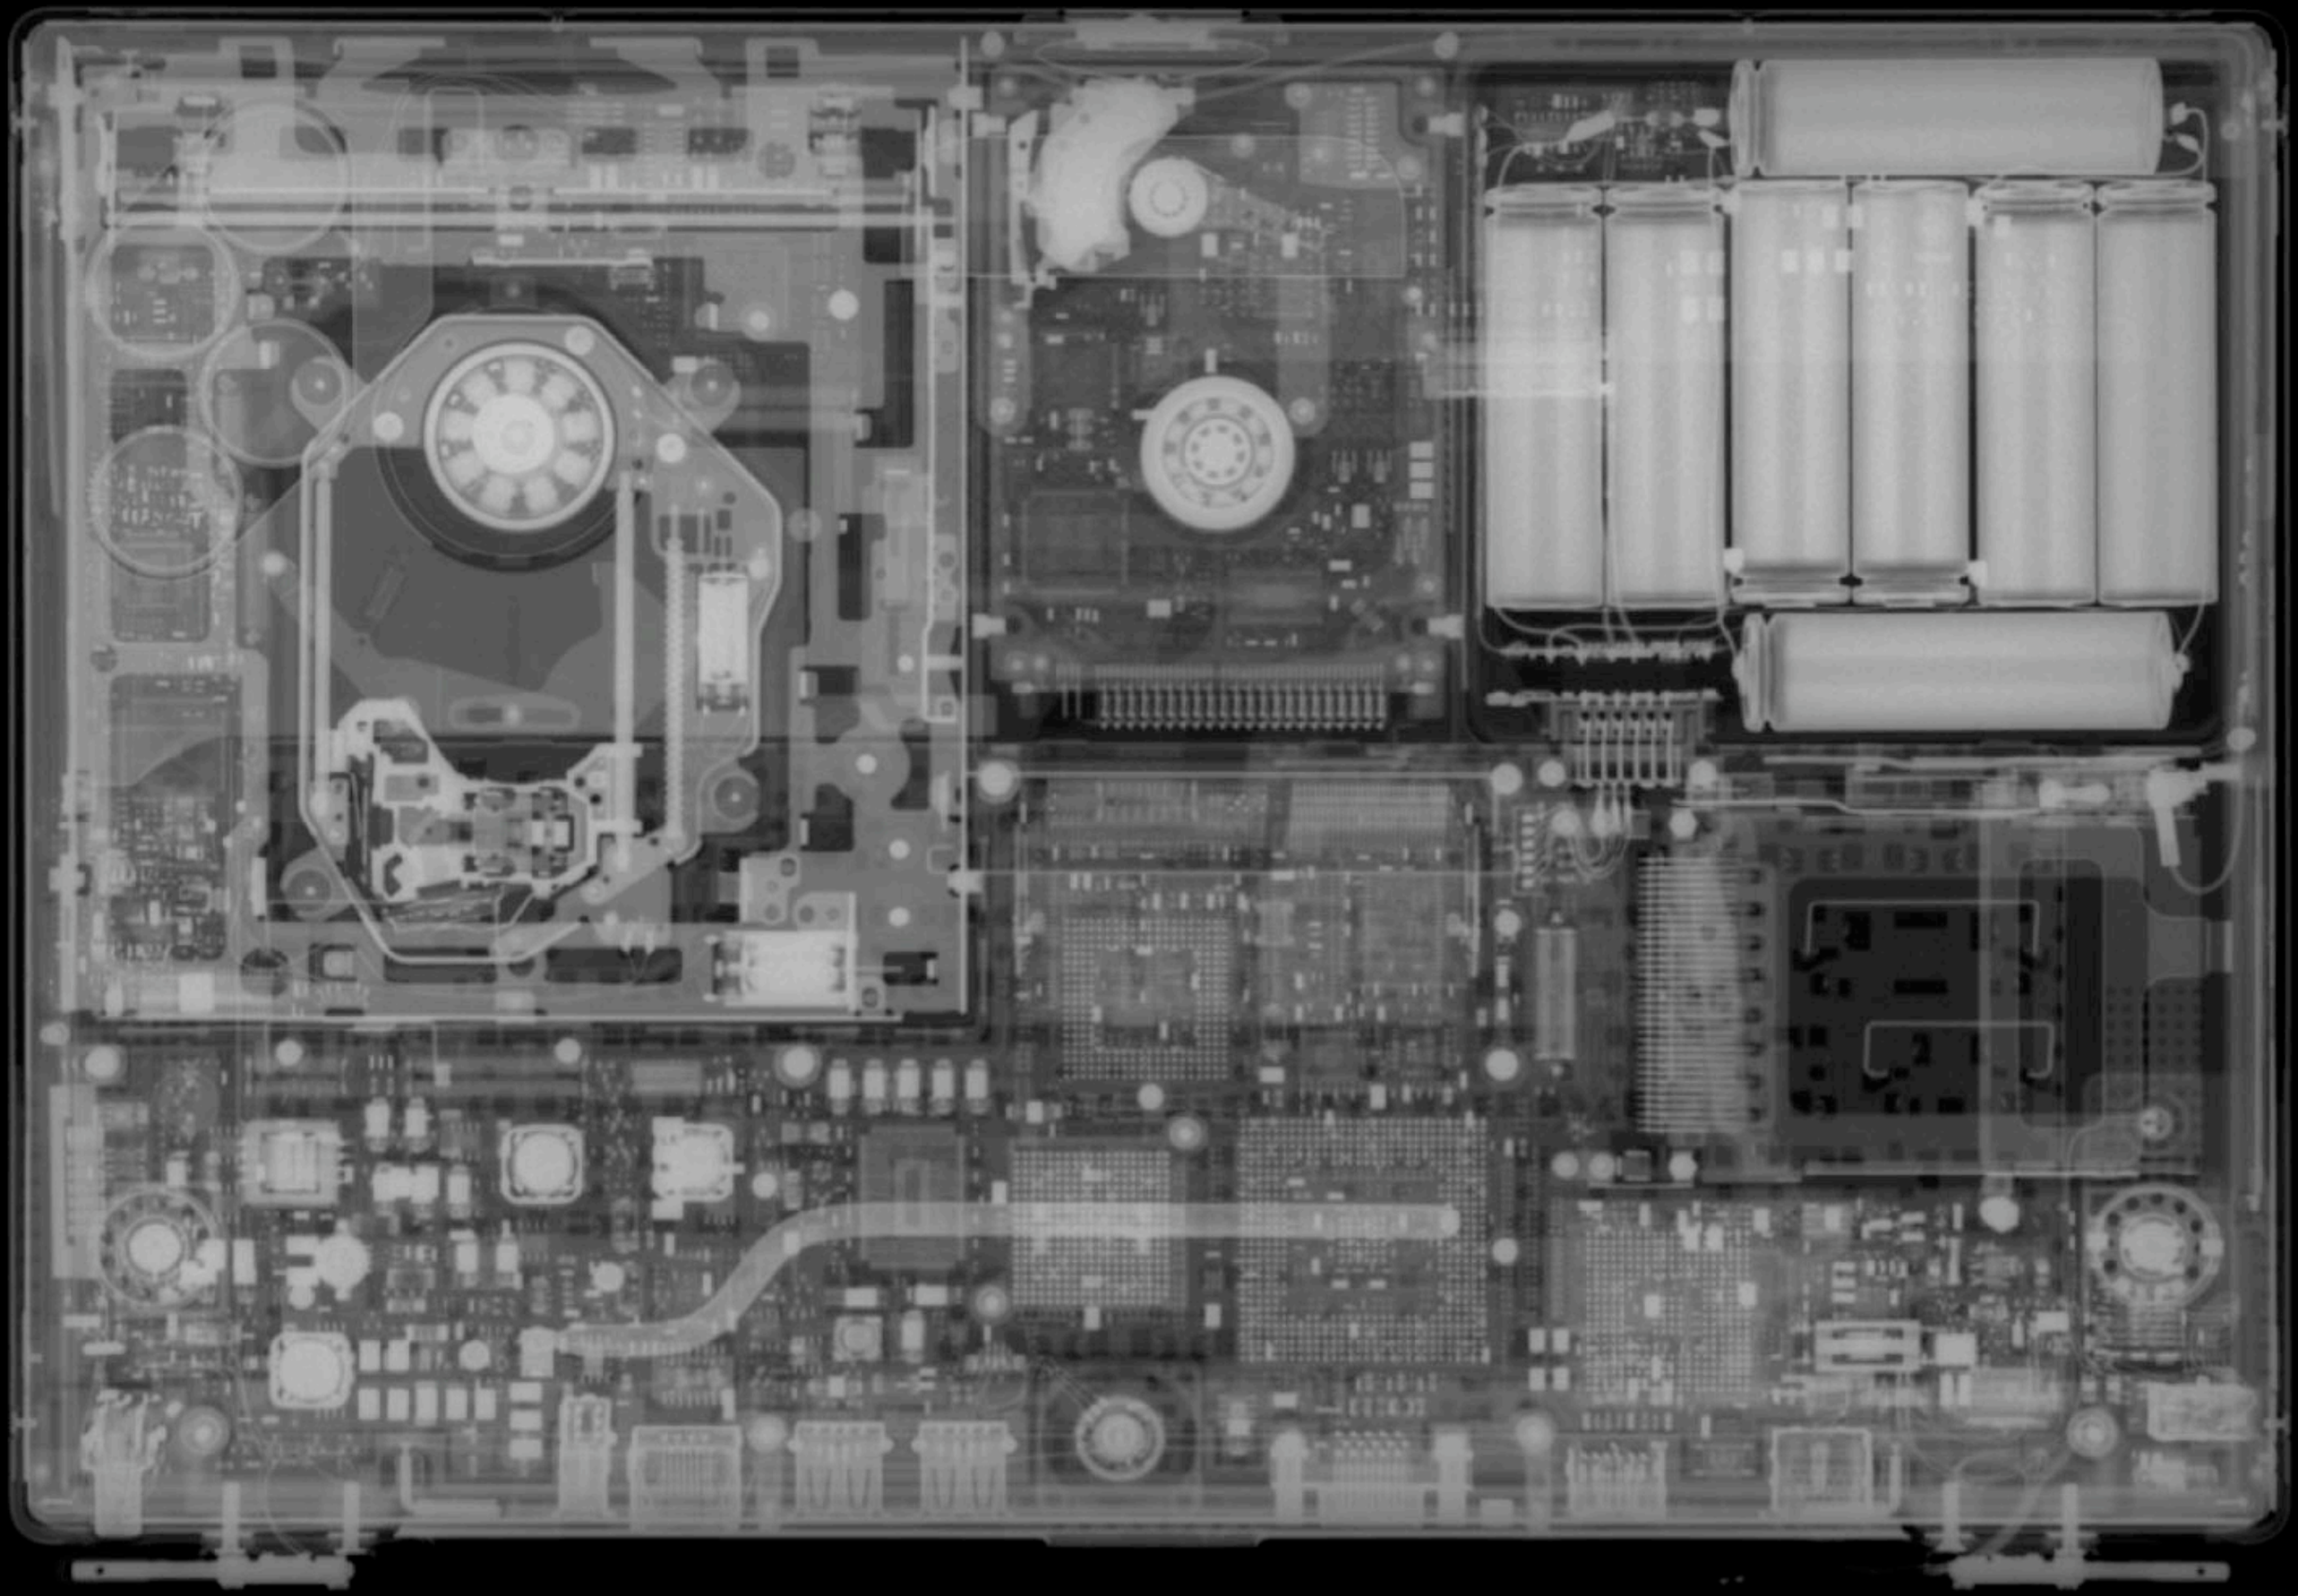
- Abstractions for network protocols
  - Sockets, DNS
  - HTTP, HTTPS, FTP
- CoreFoundation style
  - Data types, asynchronous
- New in Panther
  - CFHost: async DNS lookup, reachability…

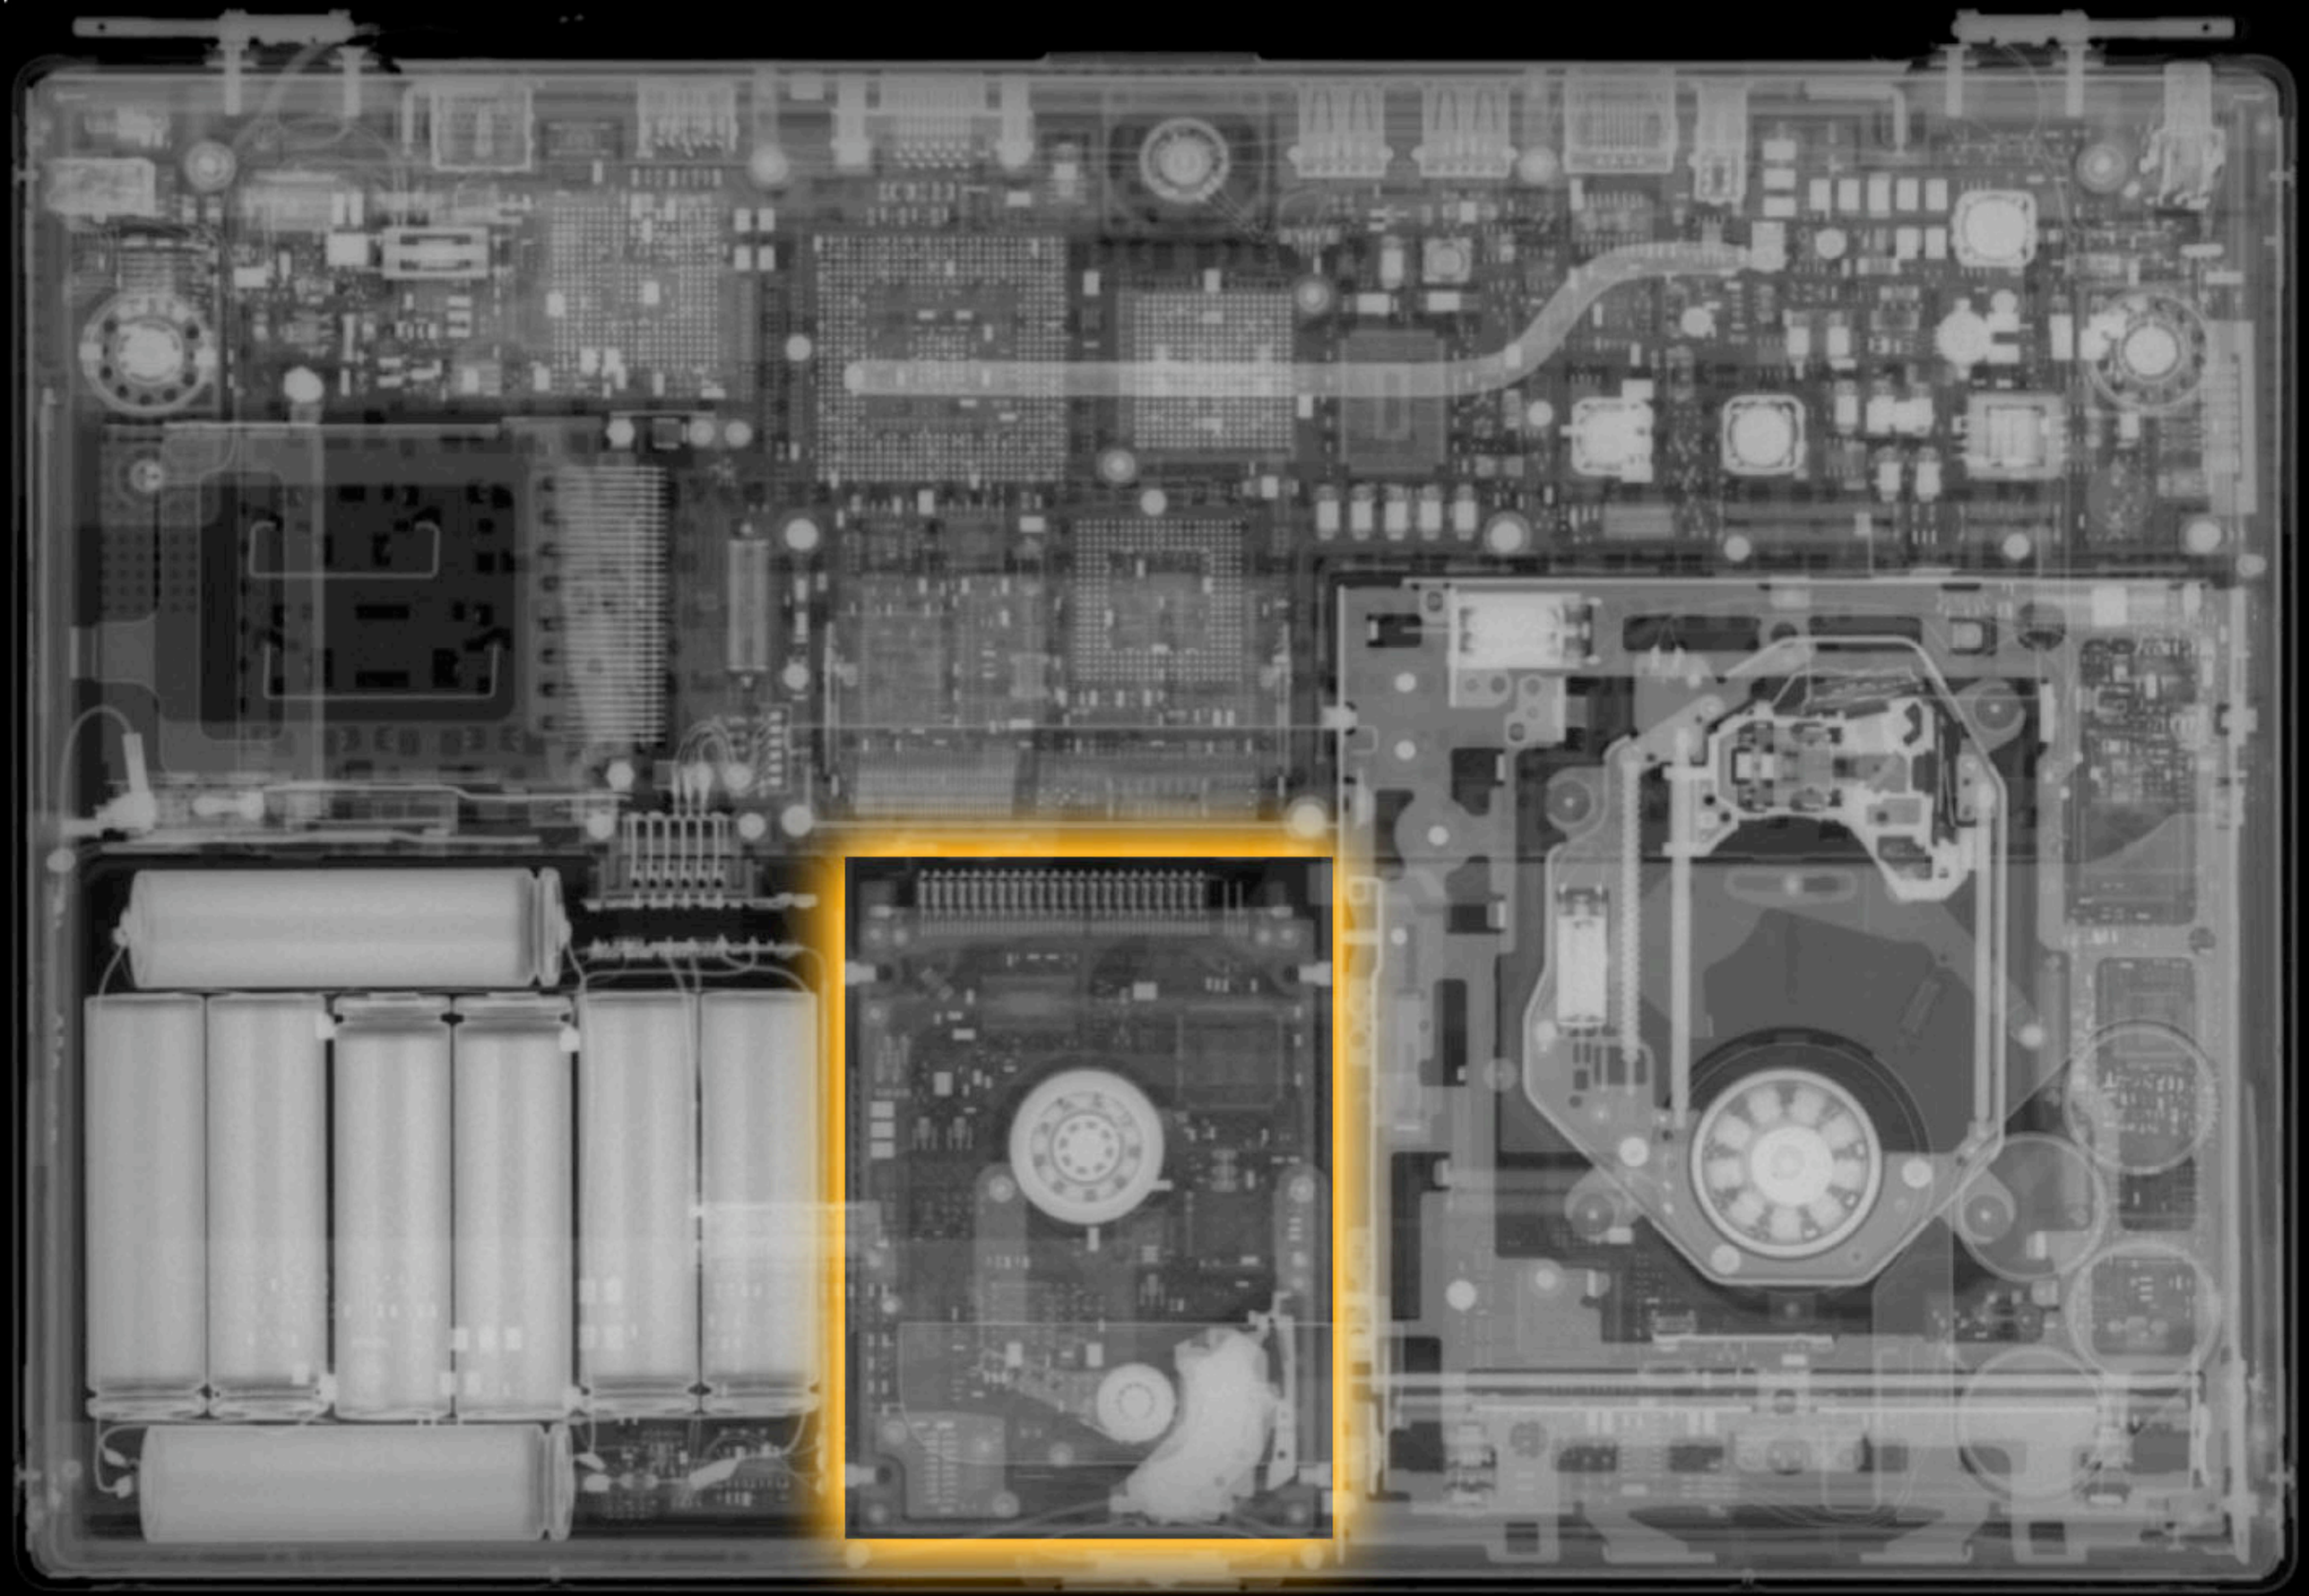
# CFNetwork

## It’s easier

## It’s fast

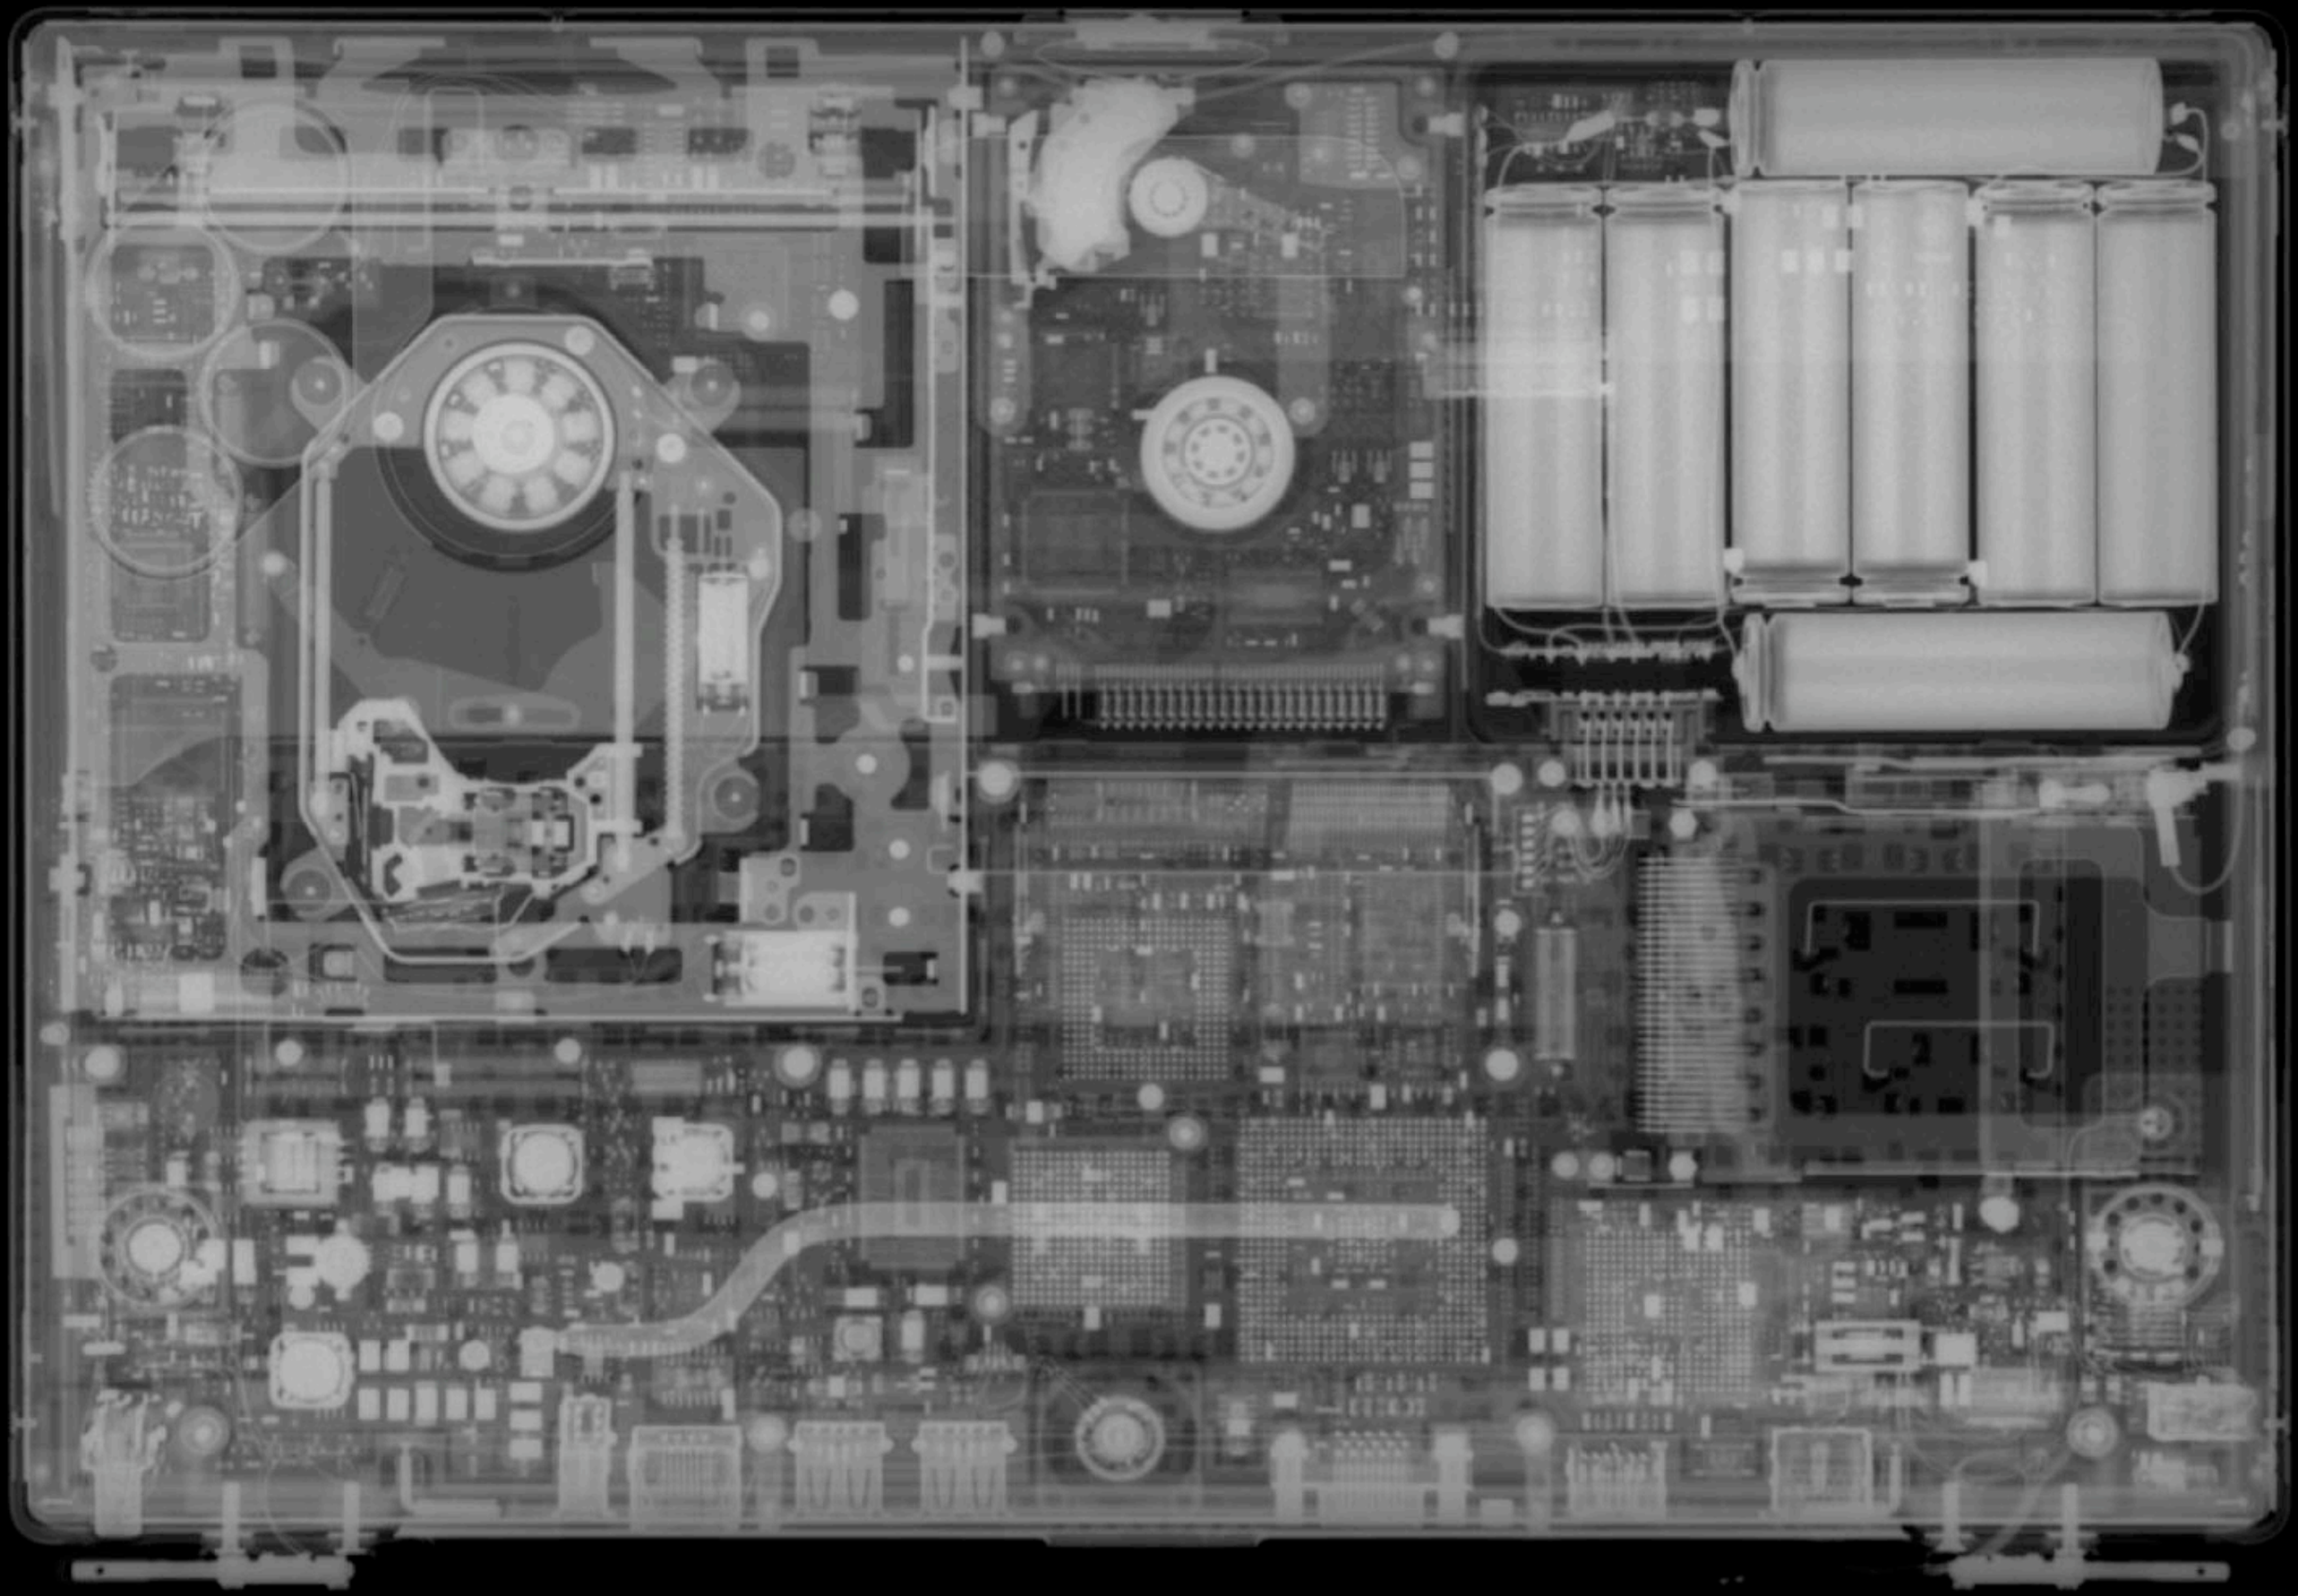
# CFNetwork

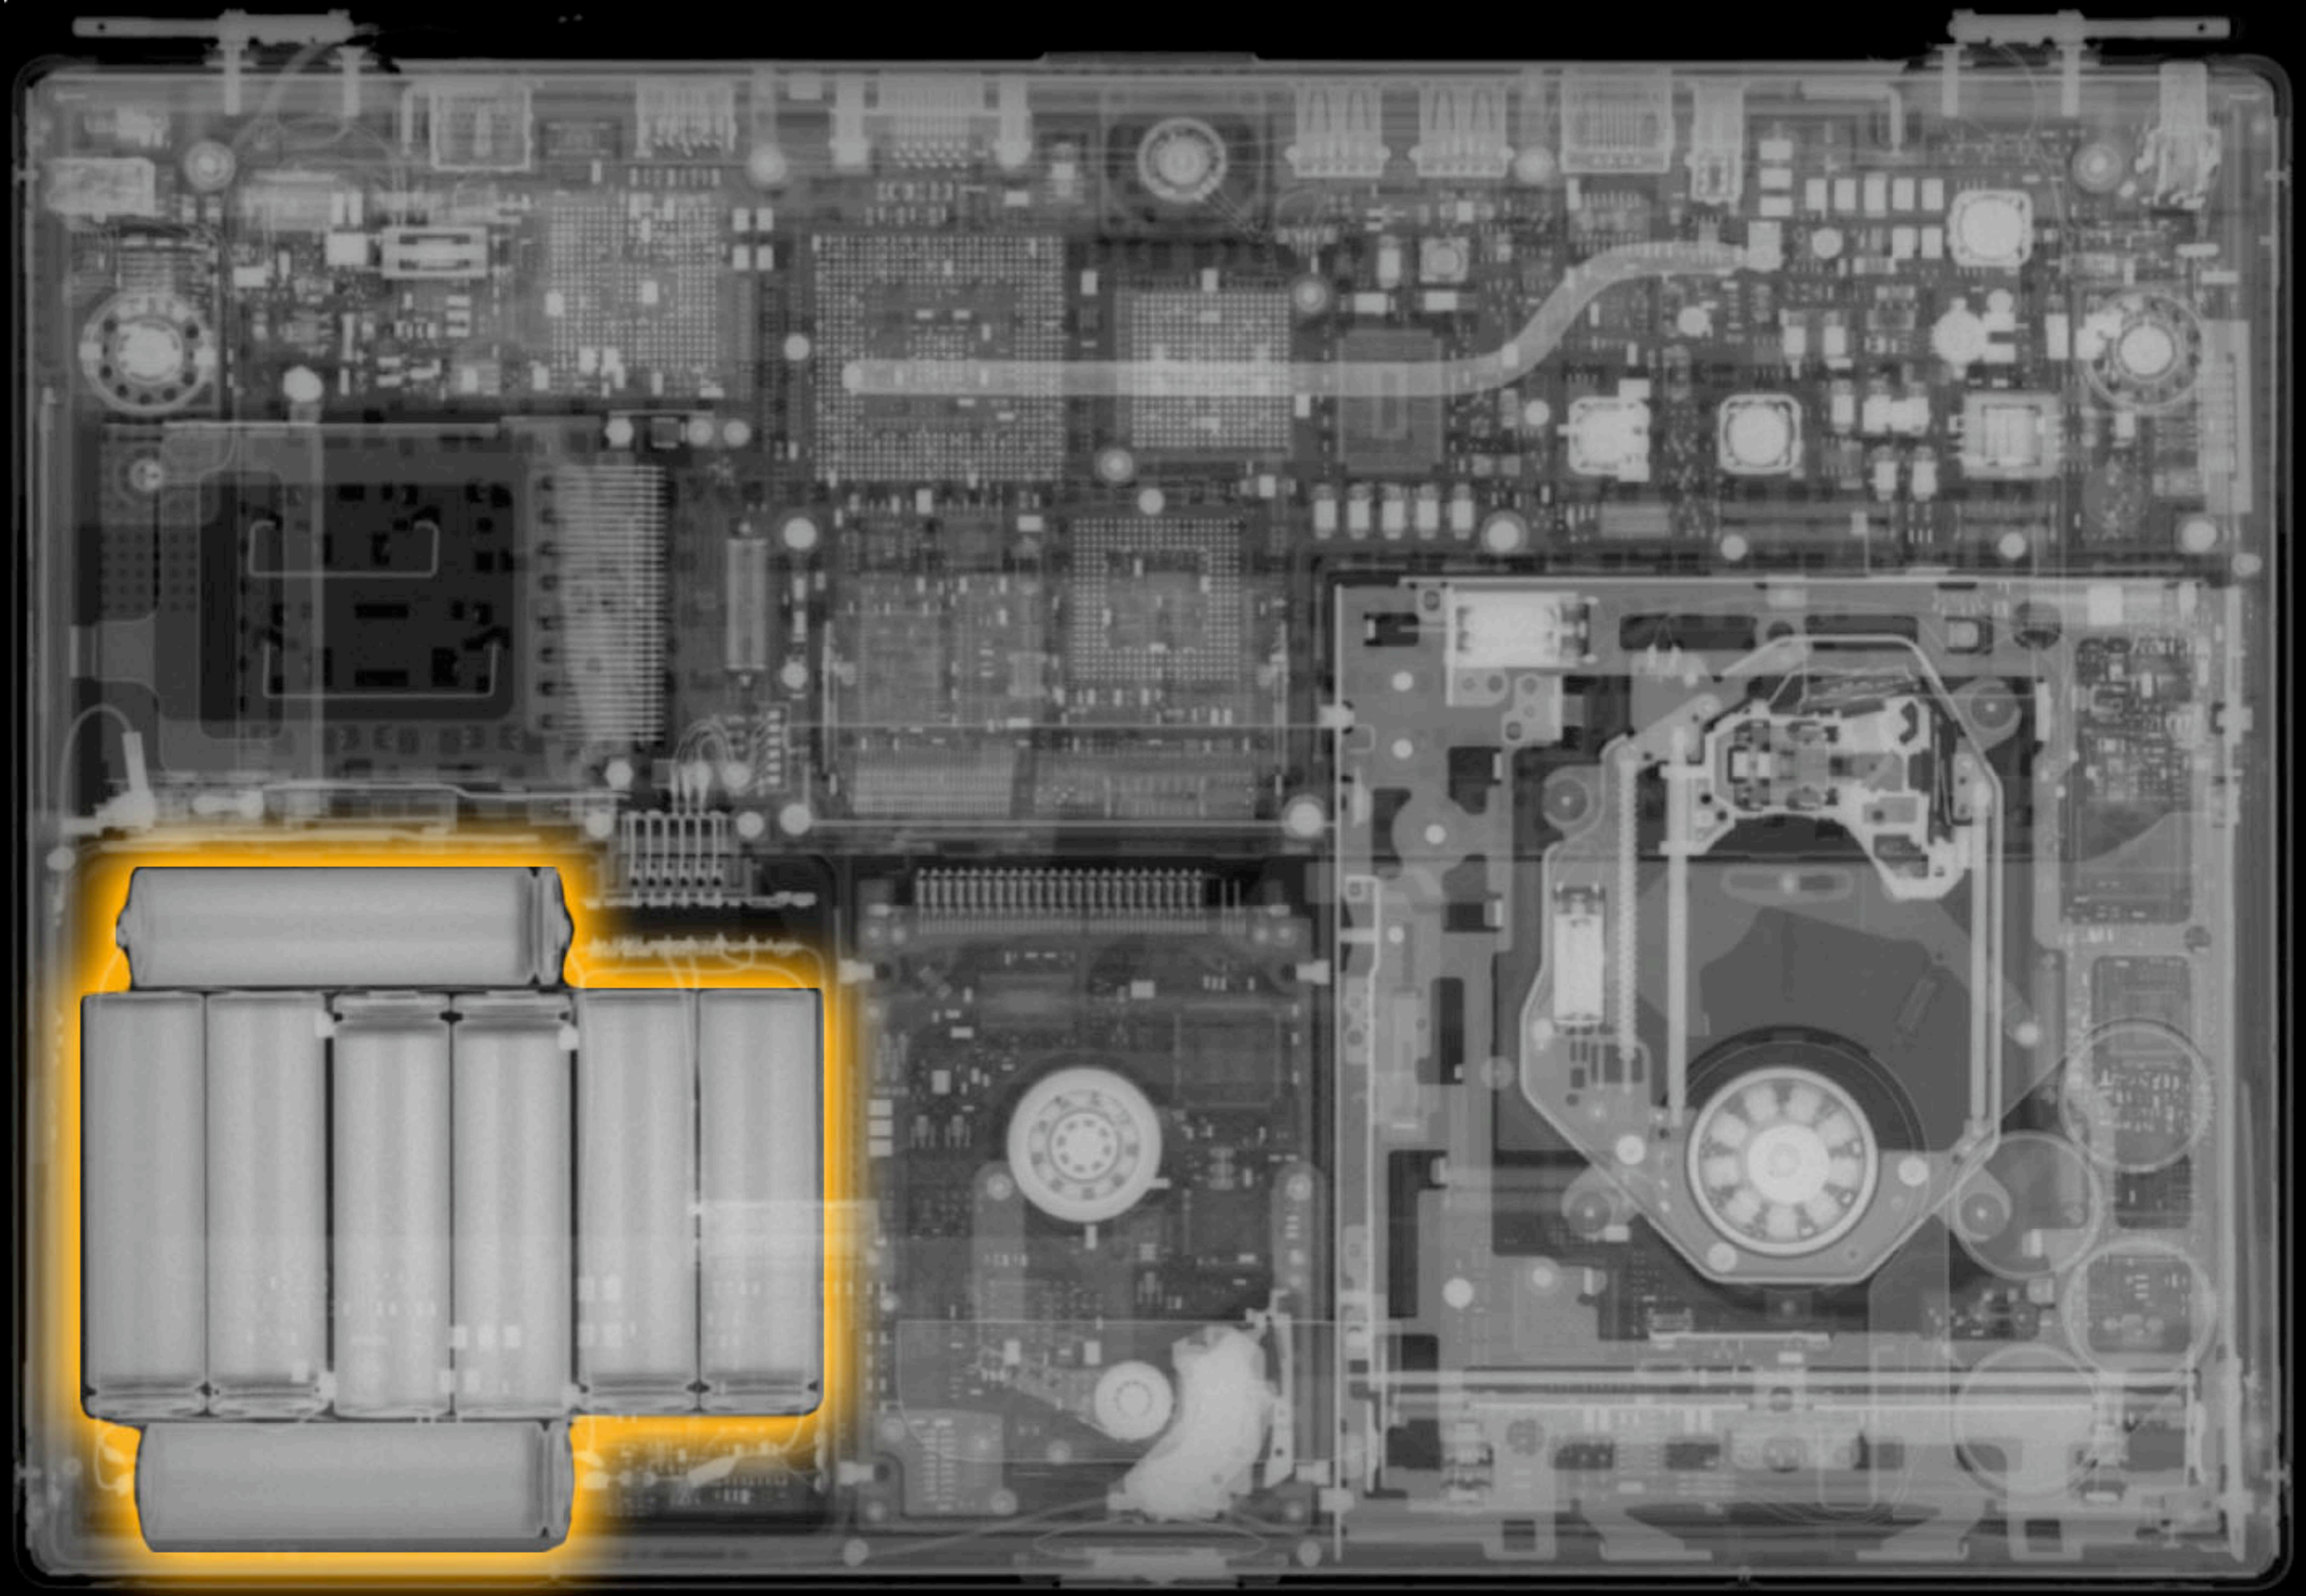


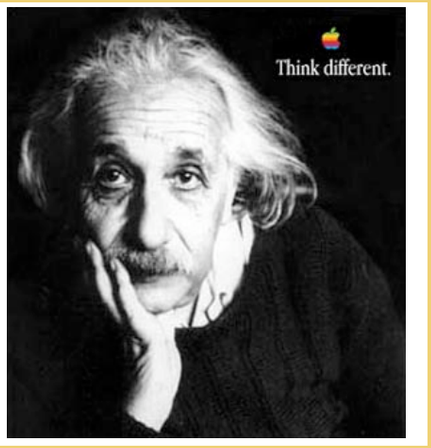


# Storage

- Problem #1: Disconnection
  - AFP mobility-aware
  - NFS mobility-aware
- Problem #2: Data Syncing
  - Addresses; Calendar
  - Bookmarks
  - File Syncing: iDisk

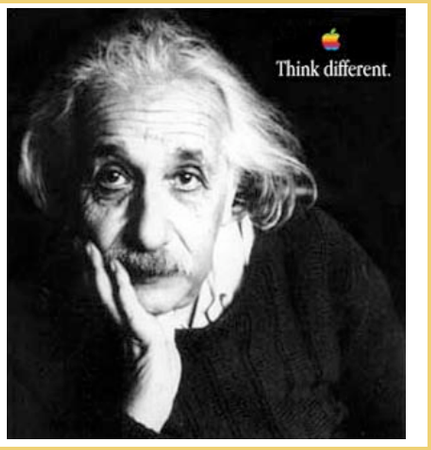






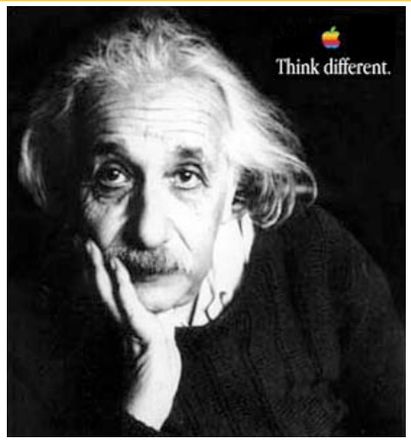
# Physics

## Battery = Energy



# Physics

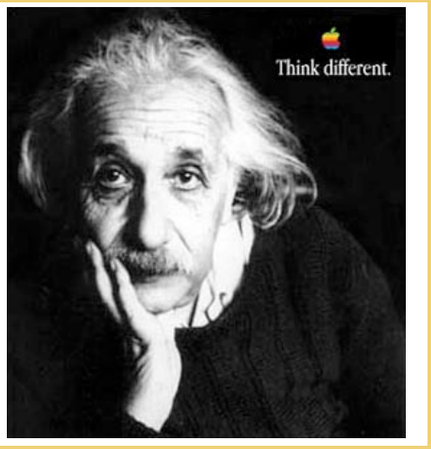
Energy =
Computation * Frequency$^2$



# Physics

Energy =
Computation * Frequency$^2$

OS adjusts speed automatically

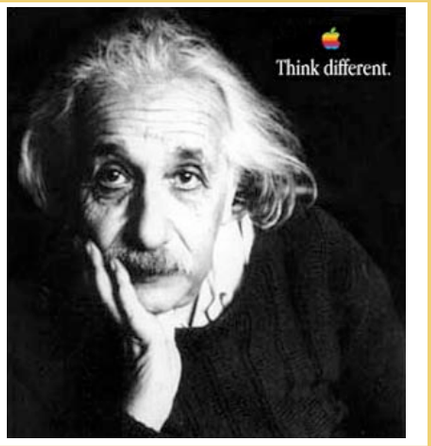


# Physics

Energy =

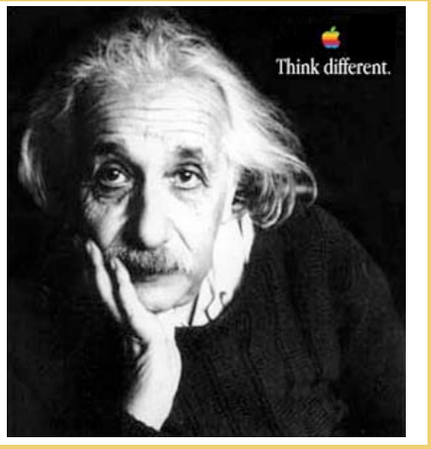
Computation * Frequency$^2$

Avoid unneeded computation



# Physics

- Minimize Computation
- Event Driven



# Physics

# Your App & Mobility

- Adopt
  - System networking
  - Reachability APIs
  - CFNetwork
- Performance
  - More async (e.g., use threading)
  - Event-driven
  - Compute less!

# Café Computing

# Sends other UNIX boxes to /dev/null.

"My PowerBook G4 is now running every major UNIX app that we had on our Suns, AlphaStations and SGIs – and running them faster."

*–Mark Cohen, Ph.D., Professor, Brain Mapping Center, UCLA*

"This new OS has accomplished in a short period of time what others have struggled to do for years: bring a compelling, widely accepted GUI (called Aqua) to UNIX."

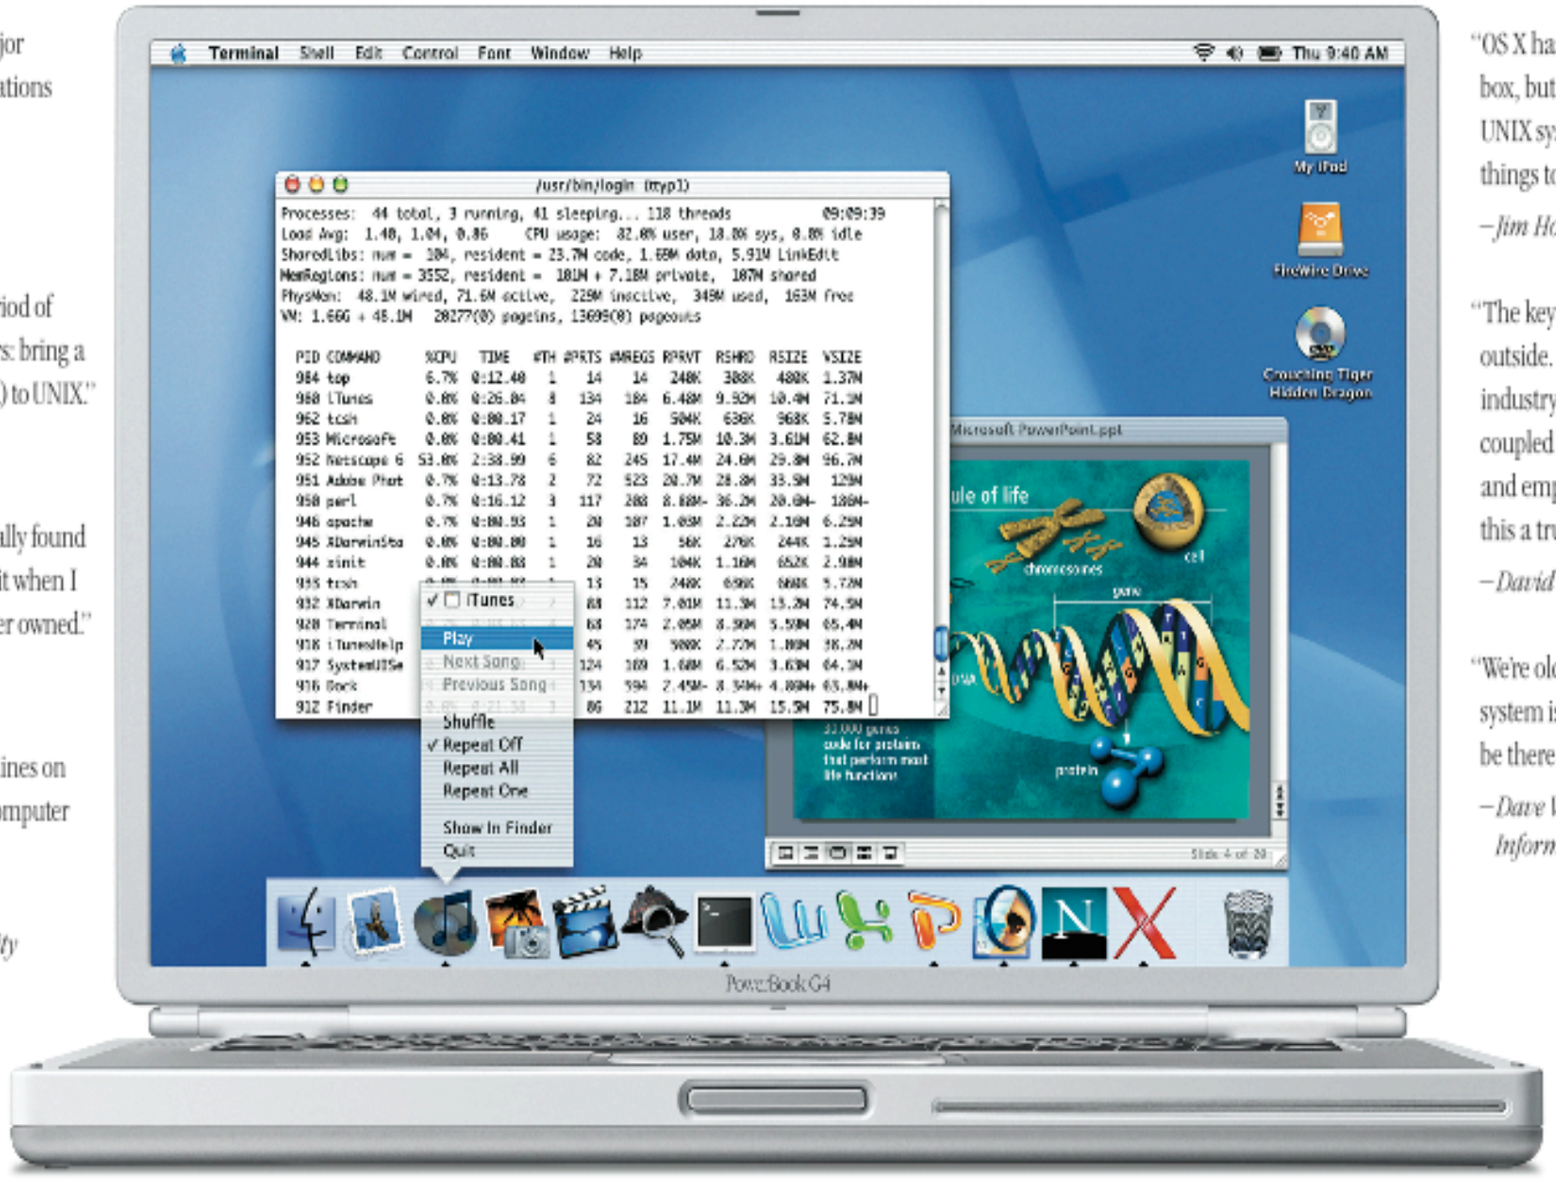
*–Tim O'Reilly, O'Reilly Network*

"After two-and-a-half years of Linux, I've finally found joy in a UNIX operating system. And I found it when I purchased a Macintosh – the first one I've ever owned."

*–John Hummel Jr., The Gamers' Press*

"Until Mac OS X came along, I had three machines on my desk. Now with Mac OS X, I can use one computer for writing, coding, research, everything."

*–Dr. Michael Cherry, Associate Professor, Department of Genetics, Stanford University*



"OS X has all the power you expect from a UNIX box, but none of the hassle associated with basic UNIX system administration. You can expect things to work and they do."

*–Jim Hourihan, Tweak Films*

"The keys to OS X are that it's UNIX inside and Mac outside. This combination of stability, support for industry standards, and wide developer support coupled with Apple's Aqua graphical user interface and emphasis on graphic performance makes this a truly great operating system."

*–David Coursey, ZDNet AnchorDesk*

"We're old hardcore UNIX hackers, so a BSD-based system is mother's milk. Everything you expect to be there is there, and it works right."

*–Dave Weininger, President, Daylight Chemical Information Systems, Inc.*

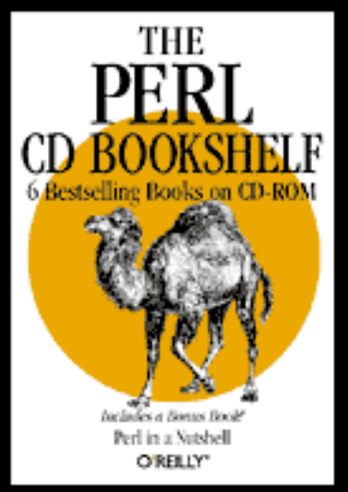
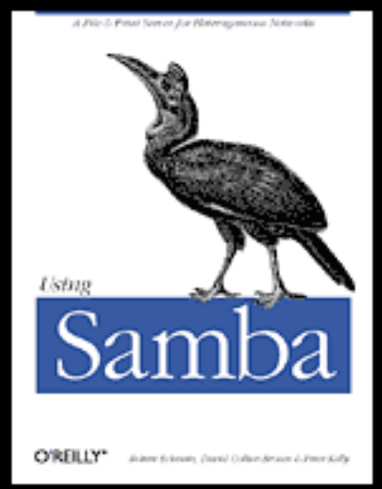
Sun microsystems

# Good Unix Citizen





# Anything Missing?

# X11

- Ubiquitous in the Unix world
  - Scientific, Higher-Ed, Enterprise, …
- Integrated
  - X11 Windows mixed in
- Fast
  - X11's OpenGL = native OpenGL

# Standards

- Added
  - libXML2
  - International Components for Unicode (ICU)
  - wchar_t, postfix, vim, net-snmp, …
- Constant refresh
  - Perl 5.8.1, python 2.2.3, Tcl 8.4.1, ruby 1.6.8, Libc (FreeBSD 5.0), samba 3.0, BIND 9, Kerberos, autoconf, more, tar, php4, UFS, …

# File Systems

- Journaling
- NFS Locking
- Mobility
  - AFP, NFS disconnection
- Performance
  - SMB, NFS, WebDAV
  - UFS

# Architecture

# The Old Way

# The Old Way

1. Design
   - Engine and APIs
   - Top-down and bottom-up
2. Write a lot of code
3. Connect to outside world

# The New Way

# Open

# Source

# The New Way

1. Pick the body of code
   - Size, speed, standardness, reputation
2. Write adaptors to your system
   - Value-added
3. Advocate changes with community

# Advantages

- Time-to-market
- Reliability
- Security
- Two-way exchange with community

# Examples

- gcc
- Darwin
- CDSA
- cups

- ICU (locales)
- FAX
- libXML2
- kHTML

# Your App & Unix

- Bring your Unix app
- New markets
- Explore new synergies
- Incorporate Open Source

После недавней исследовательской экспедиции в чернобыльскую зону Министерство энергетики США первоначально поставило перед собой задачу оценить экологическое влияние чернобыльской аварии 1986 года на население диких животных. Мы ответили, что хотя и трудно сделать количественную оценку, общее экологическое влияние было позитивным.

Apple's Worldwide Developers Conference 2003 will be the biggest ever. With extensive coverage of the next [illegible] Mac OS X, codenamed "Panther" — released as well as a preview

release, we'll teach attendee — WWDC is a don't miss opportunity. Come learn about the future of Mac OS X from the Apple engineers who created it! [May 23 2003]

# The Age of HIView

- HIView is the future of HIToolbox
- HITextView
- HIView-based menus
- HIView layouts
  - Springs and rods
  - Complex HIView relationships
  - Much faster

# Faster HIToolbox

- Quartz HITheme APIs
  - Leverage Quartz drawing
  - Much faster
- DataBrowser
  - 25% faster to add items
  - 80% faster to remove items
  - Much faster for large data sets
  - Now supports compositing mode
- Window resizing

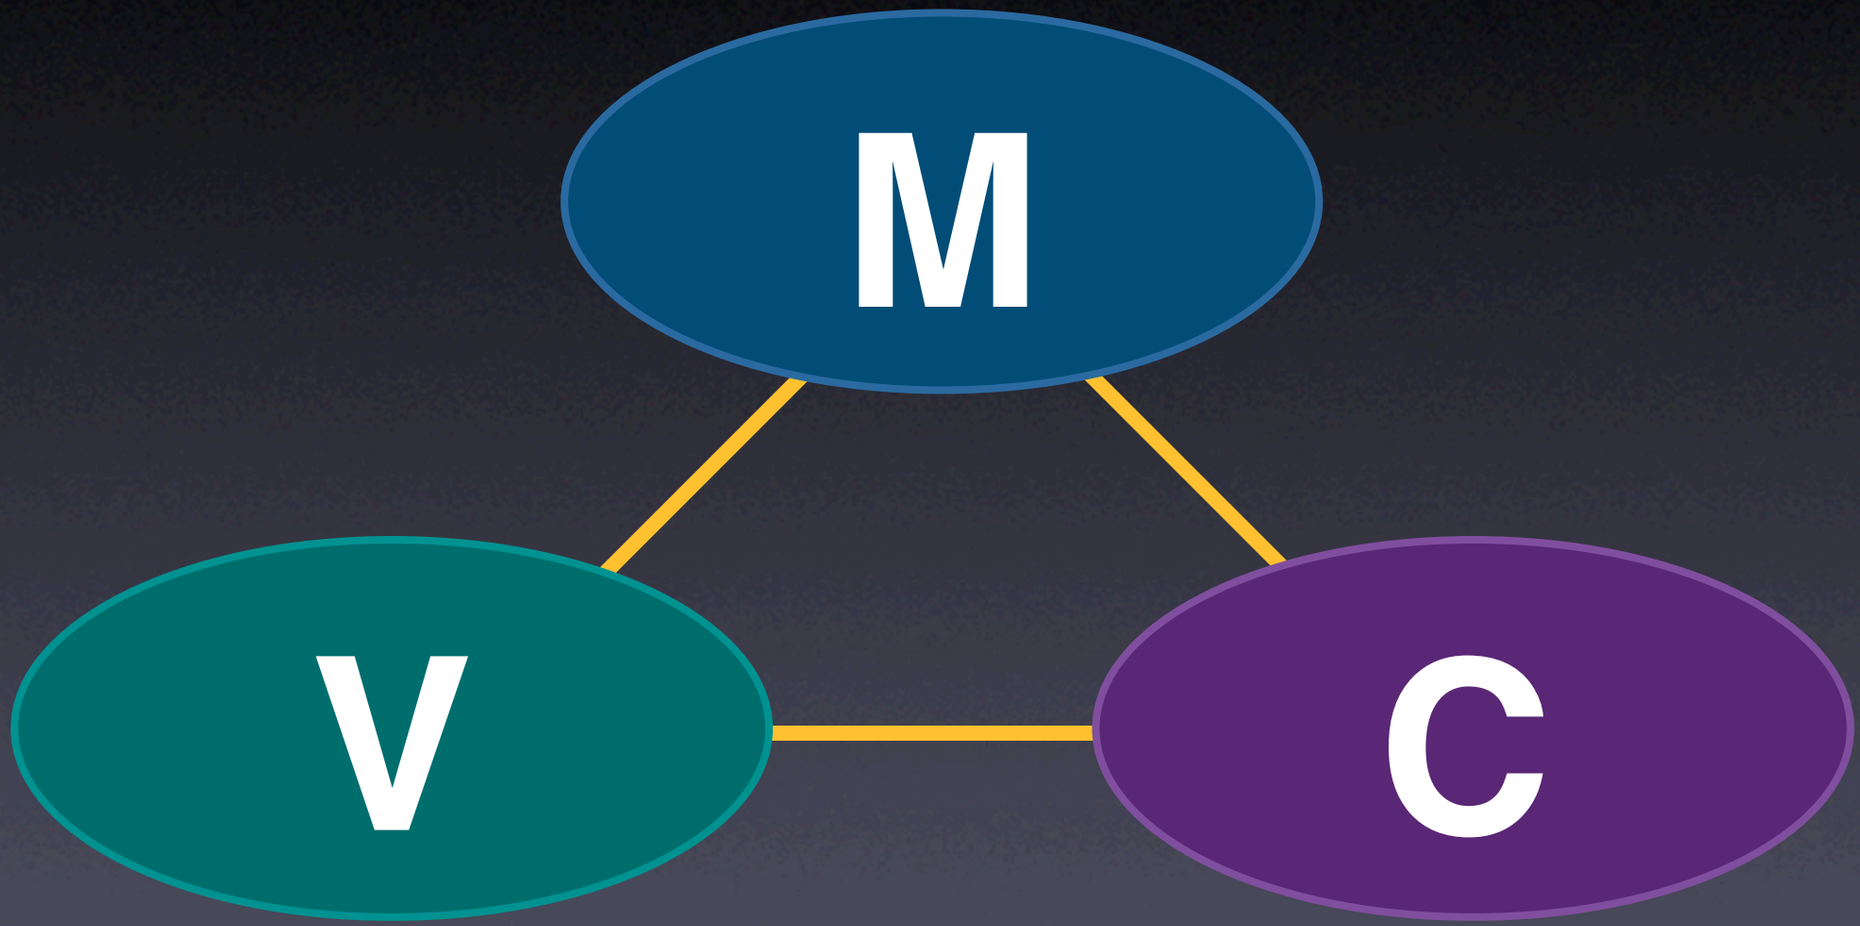
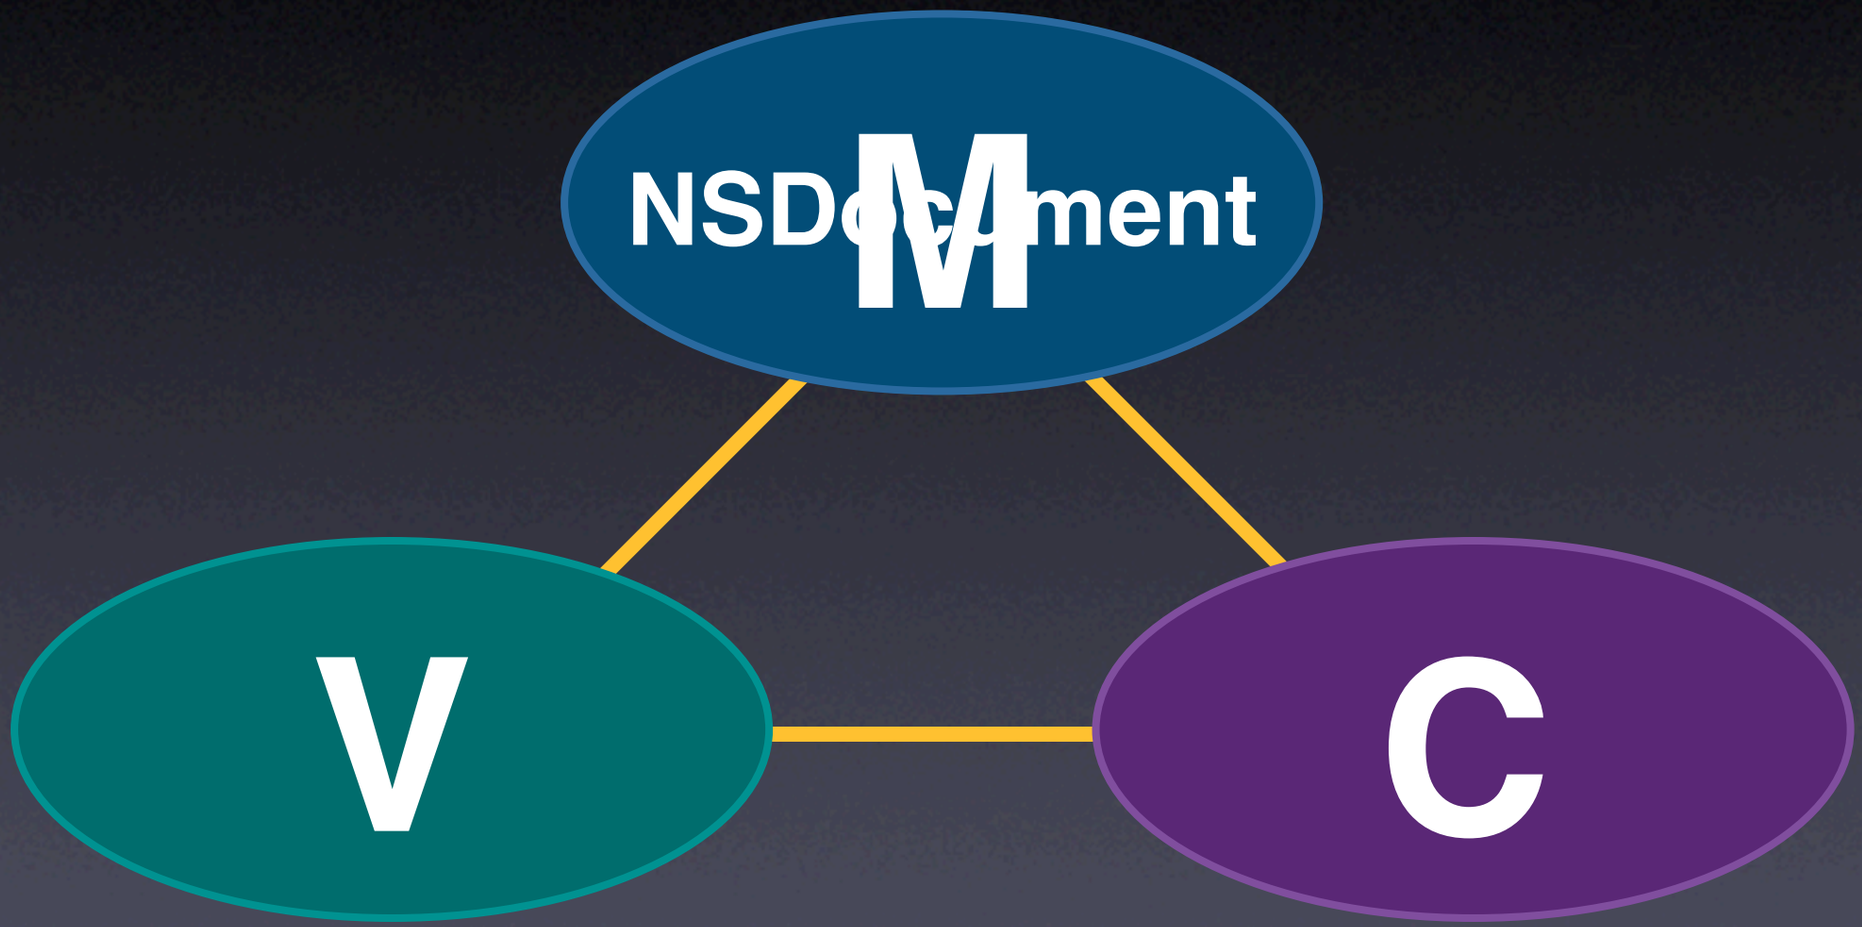
# Model-View-Controller



# Model-View-Controller



# Model-View-Controller

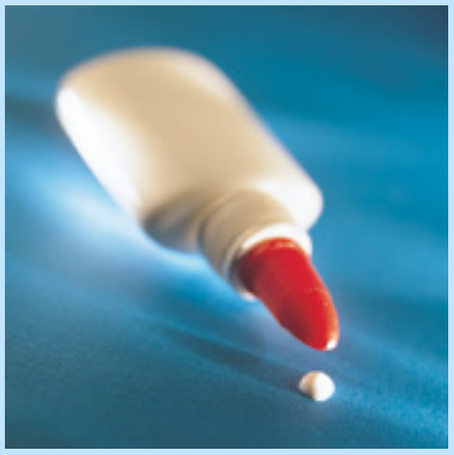
# Why a Controller Layer?

- Make Mac OS X the most efficient development platform
- Provide standard functionality
- Eliminate redundant code
- Controller layer eliminates entire class of glue code



# UI Glue Be Gone

- Updating model when user changes value in UI
- Reflecting model in UI
- Keeping UI elements in sync
- Updating UI in response to user action

Movie Information for **Finding Nemo**

A clownfish named Marlin and his son Nemo live in the safe waters off the Great Barrier Reef. Then, Nemo is accidentally taken away and put in a Sydney dentist's aquarium. Along with the help of the kind but forgetful Dory, Marlin sets off on a dangerous journey to rescue his son.

# Safari

# Safari Goals

1. Fast
2. Small

# Performance

- Made performance the most important feature
- Started with small codebase
- Allowed no performance regressions

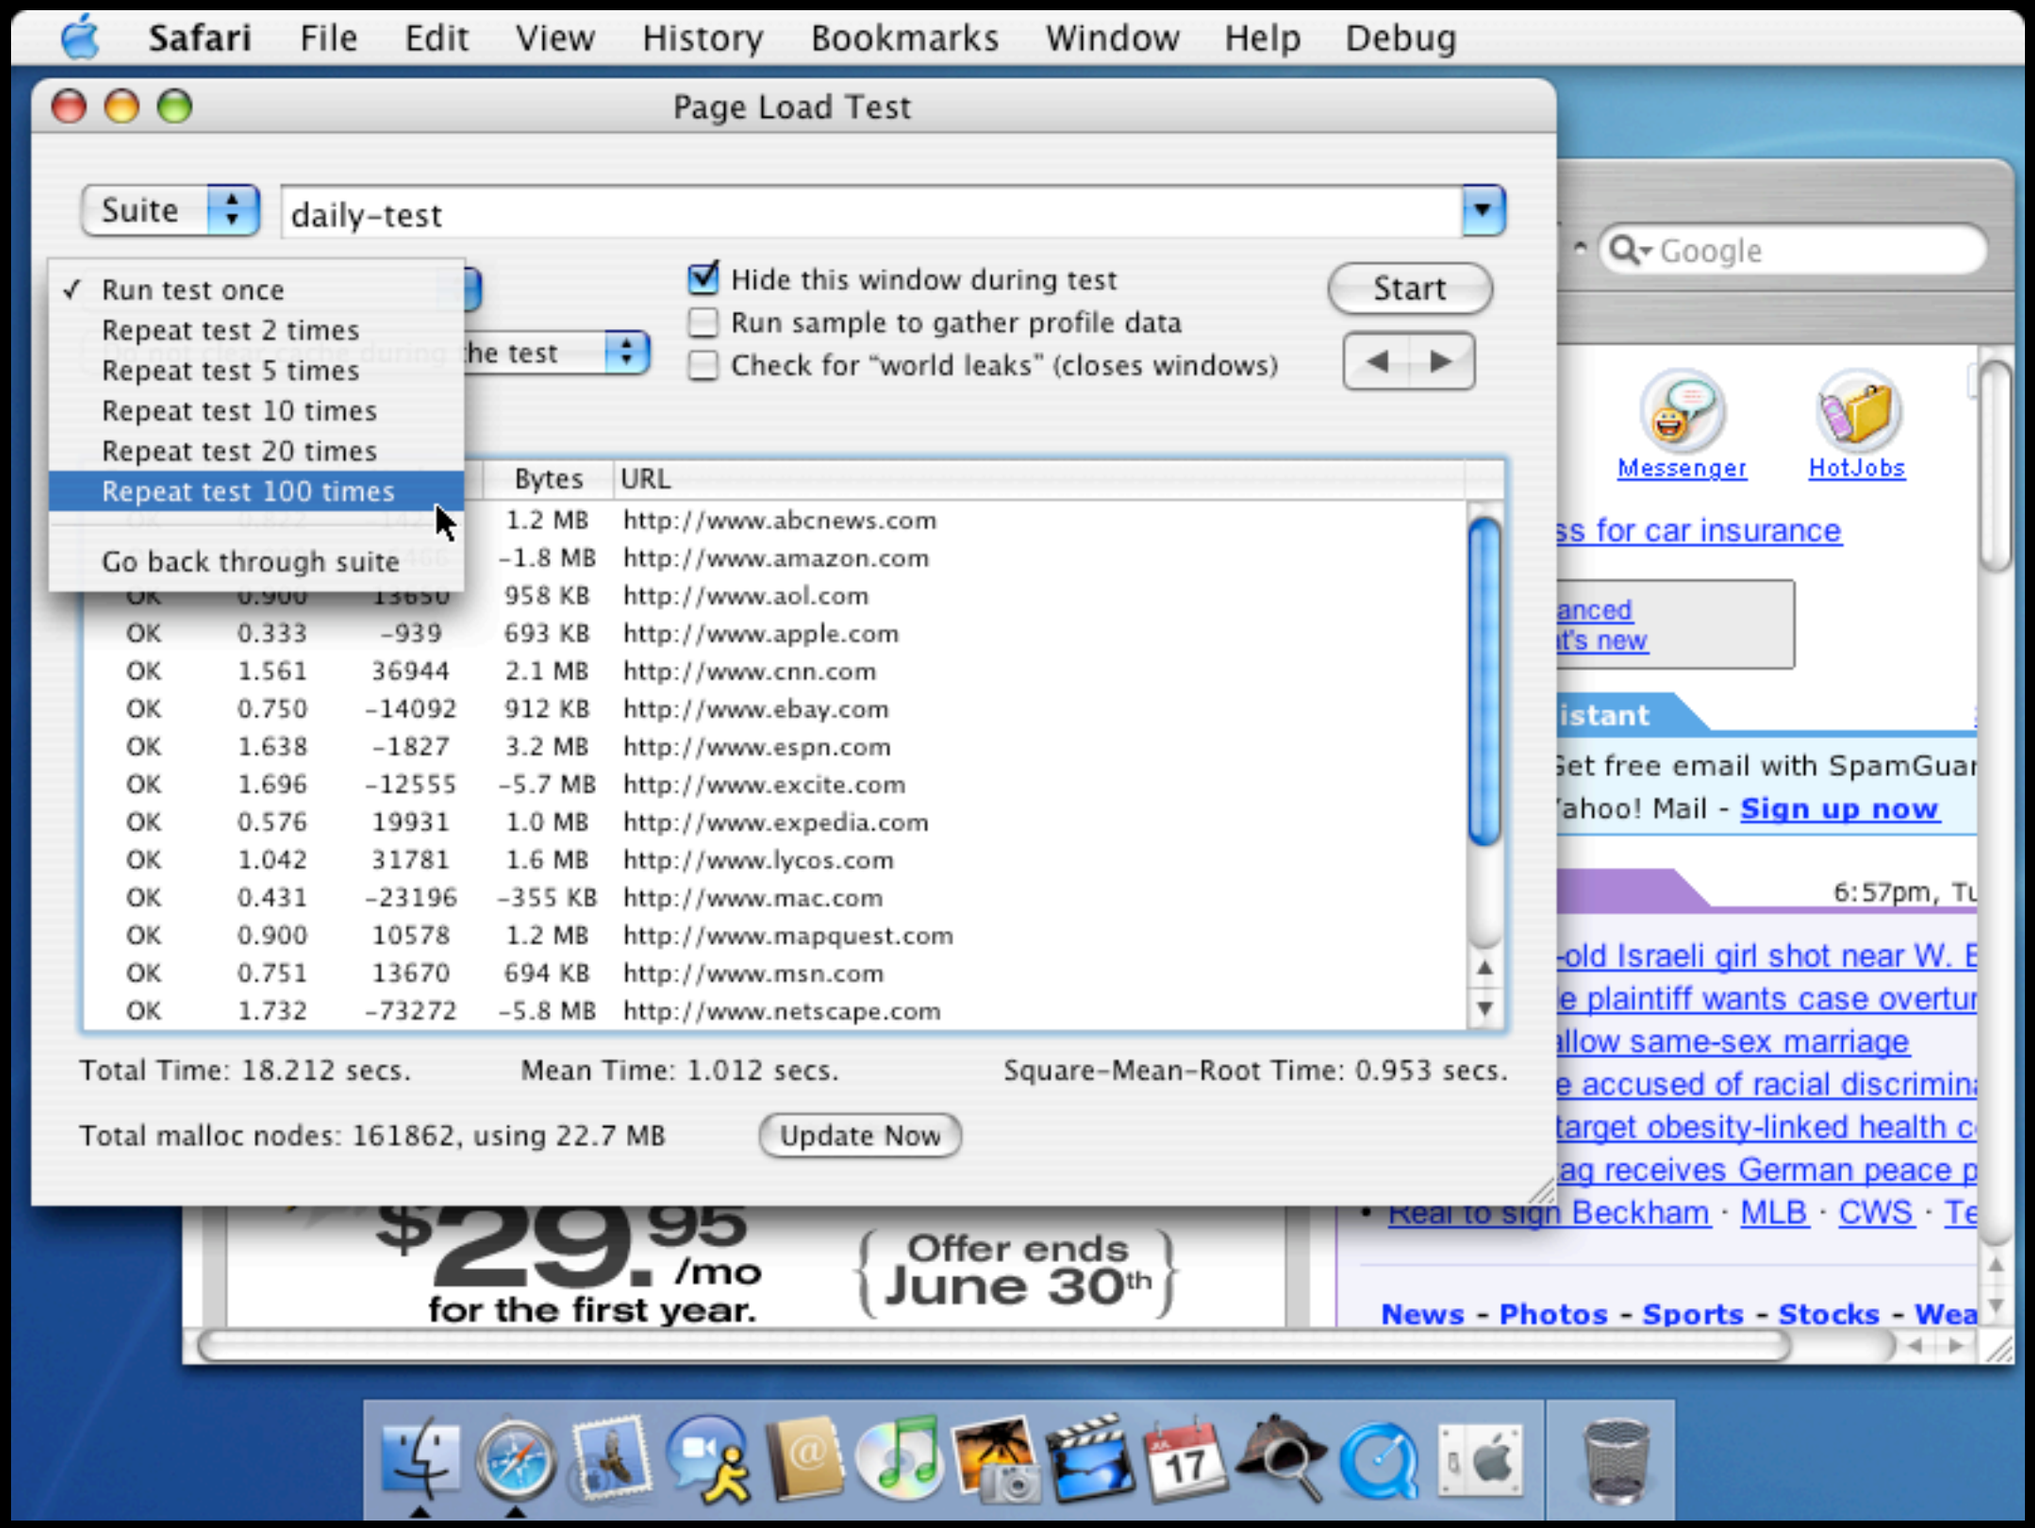
# Measure Constantly

- Hand time
- Sampled running process
- Built automated tests
- Created charts

# Use the Tools

- Sampler
- Malloc Debug
- heap
- Quartz Debug
- fs_usage
- …and many others!

# Built Performance Tests Into App



# Lessons

- Make performance a priority
- Use the right API for the job
- Measure, measure, measure
- Never regress!

# Safari Goals

1. Fast
2. Small
3. Native
4. Real world standards compliant
5. Embeddable

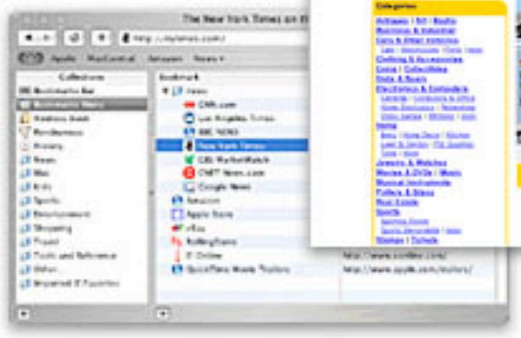
# Safari

## The turbo browser for Mac OS X.



Download Safari Public Beta 2

**Safari offers you a superior Web experience with outstanding performance. Even the most complex of pages load at breakneck speed. In fact, Safari loads pages more quickly than any other Mac Web browser. But that's not all. Safari uses the advanced interface technologies underlying Mac OS X to offer you an all-new view of the Web, one that's much easier to use.**

**Learn more about Safari**

**New in Safari Beta 2**

- Tabbed browsing
- AutoFill forms & passwords
- Privacy reset
- Available in English, Japanese
